

CAM8000-D Module

Order#: CAM8000-D

CAM8000-D Digital Camera Module is designed for using on Embest **Devkit7000**, **Devkit8500D** and **SBC8530** products connecting via 30-pin FPC connector. It uses a CMOS image sensor which is a 2 megapixel Digital Camera.

CAM8000-D Digital Camera Module

CAM8000-D connects to Devkit8500D board

Hardware Features

Dimension	38.11mm * 34.12mm * 6mm
Signal system	CMOS 2 megapixel
Resolution	up to 1600 * 1200

Frame rate	15 fps for UXGA
	30 fps for SVGA
Interface	30-pin FPC connector
Power supply	From board
Working Temp.	-20 ~ +70°C
Board Support	Devkit7000, Devkit8500D

Software Features

OS	Item	Status
Linux	Resolution	640 * 480
	Photograph	Not supported yet
WinCE	Resolution	640 * 480
	Photograph	1600 * 1200
