- Share printers, modems, or other peripherals.
- Tested to 25,000 use-cycles to ensure reliability.
- Guaranteed for life!

Further Details

Space is at a premium for all businesses today. You might have to Protect your data with Lockable DB9 Switches from Black Box. They're our dependable manual switches with a lock and key—if you don't have the key, you can't turn the switch.

Place your equipment in areas that are readily accessible to unauthorized staff.

You've spent thousands of dollars on hardware and software to keep your precious data safe and secure. Then someone flips a cheap manual switch from A to B, and your data and connection are lost before you know it.

But if you use a lockable switch from Black Box, no one can tamper with your switch connection. So, whether you're protecting your data from malicious intruders or good-intentioned "helpers," our lockable switches are an affordable solution, and they're guaranteed for life.
