**2. HAZARDS IDENTIFICATION**

**EMERGENCY OVERVIEW**  
**PHYSICAL APPEARANCE:** Clear, Colorless, Volatile Liquid  
**IMMEDIATE CONCERNS:** Warning! High concentrations of vapor can reduce oxygen available for breathing. Harmful if inhaled. May decompose on contact with flames or extremely hot metal surfaces to produce toxic and corrosive products.

**POTENTIAL HEALTH EFFECTS**  
**EYES:** Liquid contact can cause irritation, which may be severe.  
**SKIN:** Prolonged or repeated contact can result in defatting and drying of the skin which may result in skin irritation and dermatitis (rash).  
**INHALATION:** High concentrations in immediate area can displace oxygen and can cause dizziness, unconsciousness, and possibly death with longer exposure. Keep people away from such vapors without self-contained breathing apparatus.

**SIGNS AND SYMPTOMS OF OVEREXPOSURE**  
**EYES:** Can cause severe eye irritation.  
**SKIN:** Exposure to rapidly expanding gas or vaporizing liquid may cause frostbite ("cold" burn).  
**INHALATION:** High concentrations may lead to central nervous system effects (drowsiness, dizziness, nausea, headaches, paralysis and loss of consciousness).  
**ACUTE TOXICITY:** Overexposure may cause dizziness and loss of concentration. At higher levels, CNS depression and cardiac arrhythmia may result.

(a) Each 25,000 containers or less, successively produced as a batch or part thereof must constitute a lot. One container taken randomly from the lot and complete with the ends assembled must be pressure tested to destruction. The end must not buckle below 261 psig. The burst pressure of containers must not be less than 320 psig.

(b) If the test container fails to meet the above requirements, the lot must be rejected. However, an additional 5 randomly selected pairs of containers from that lot may be pressure tested to qualify that lot. If any of the additional test containers fail the pressure test, that lot must be rejected.
