Physical state: Color: Odor:	Liquid Clear, to, Amber Acetone	HIMIO. HEALTH: FLAMMABILITY: PHYSICAL HAZARD:	*2 3 0
		Personal Protection:	See MSDS Section 8
DANGER:	MAY CAUSE SKI	RITATION. JSE FLASH FIRE. ZARD IF SWALLOWED.	
Relevant routes of expos	sure: Skin, Inhalation, I	Eyes	
Potential Health Effects			
Inhalation:	May cause respir	ratory tract irritation. Central nervous system	depression, including dizziness.

innalation.	drowsiness, fatigue, nausea, headache, unconsciousness.
Skin contact:	May cause irritation due to defatting of the skin. Redness. Burns. Skin absorption is possible, but harmful effects are not expected from this route of exposure under normal conditions of handling and use.
Eye contact:	Causes eye irritation. Exposure to vapor may cause tearing of the eyes, irritation and burning sensation.
Ingestion:	Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea. Central nervous system depression, including dizziness, drowsiness, fatigue, nausea, headache, unconsciousness.
Existing conditions aggravated by exposure:	Liver disorders. Kidney disorders. Lung disorders.
	This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR

See Section 11 for additional toxicological information.

3. COMPOSITION / INFORMATION ON INGREDIENTS

1910.1200).

Hazardous components	CAS NUMBER	%
Acetone	67-64-1	60 - 100
Benzenamine, N,N,4-trimethyl-	99-97-8	0.1 - 1

4. FIRST AID MEASURES		
Inhalation:	Move to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get immediate medical attention.	
Skin contact:	Remove contaminated clothing and footwear. Wash with soap and water. Wash clothing before reuse. If symptoms develop and persist, get medical attention.	
Eye contact:	Immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention.	
Ingestion:	Do not induce vomiting. Never give anything by mouth to an unconscious person. Keep individual calm. Get immediate medical attention.	
5. F	IRE FIGHTING MEASURES	
Flash point:	-17 °C (1.4 °F) Tagliabue closed cup	
Autoignition temperature:	Not available	
Flammable/Explosive limits - lower:	2.8 %	
Flammable/Explosive limits - upper:	12.8 %	
Extinguishing media:	Foam, dry chemical or carbon dioxide.	
Special firefighting procedures:	Use water spray to keep fire exposed containers cool and disperse vapors.	
Unusual fire or explosion hazards:	Vapors may accumulate in low or confined areas, travel considerable distanc to source of ignition, and flash back. Closed containers may rupture (due to build up of pressure) when exposed to extreme heat.	
Hazardous combustion products:	Oxides of carbon. Oxides of nitrogen.	
	DENTAL RELEASE MEASURES	

personnel.		
Environmental precautions:	Do not allow product to enter sewer or waterways.	
Clean-up methods:	Remove all sources of ignition. Vapors are heavier than air and may travel along the ground or be moved by ventilation and subsequently ignited by heat, pilot lights or other ignition sources at locations distant from the material handling point. Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Store in a closed metal container until ready for disposal.	

7. HANDLING AND STORAGE

Handling:	Prevent contact with eyes, skin and clothing. Do not breathe vapor and mist. Wash thoroughly after handling.
Storage:	Keep in a cool, well ventilated area away from heat, sparks and open flame. Keep container tightly closed until ready for use.

For information on product shelf life contact Henkel Customer Service at (800) 243-4874.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Employers should complete an assessment of all workplaces to determine the need for, and selection of, proper exposure controls and protective equipment for each task performed.

Cyanoacrylates have been reported to cause allergic reaction but due to rapid polymerization at the skin surface, an allergic response is rare. Cyanoacrylates generate heat on solidification. Hazardous components	CAS NUMBER	%
Ethyl 2-cyanoacrylate	7085-85-0	60 - 100
Thickener	Proprietary	5 - 10

4	I. FIRST AID MEASURES
Inhalation:	Move to fresh air. If symptoms persist, seek medical advice.
Skin contact:	Do not pull bonded skin apart. Soak in warm soapy water. Gently peel ap using a blunt instrument. If skin is burned due to the rapid generation of h by a large drop, seek medical attention. If lips are bonded, apply warm wa to the lips and encourage wetting and pressure from saliva in mouth. Peel roll lips apart. Do not pull lips apart with direct opposing force.
Eye contact:	Immediately flush with plenty of water for at least 15 minutes. Get medica attention. If eyelids are bonded closed, release eyelashes with warm wate covering with a wet pad. Do not force eye open. Cyanoacrylate will bond t eye protein and will cause a lachrymatory effect which will help to debond adhesive. Keep eye covered until debonding is complete, usually within 1-days. Medical attention should be sought in case solid particles of polyme cyanoacrylate trapped behind the eyelid caused abrasive damage.
Ingestion:	Ensure breathing passages are not obstructed. The product will polymeriz rapidly and bond to the mouth making it almost impossible to swallow. Sal will separate any solidified product in several hours. Prevent the patient froswallowing any separated mass.
Notes to physician:	Surgery is not necessary to separate accidentally bonded tissues. Experie has shown that bonded tissues are best treated by passive, non-surgical f aid. If rapid curing has caused thermal burns they should be treated symptomatically after adhesive is removed.

6. ACCIDENTAL RELEASE MEASURES

Use personal protection recommended in Section 8, isolate the hazard area and deny entry to unnecessary and unprotected personnel.

breathing apparatus is recommended.

Environmental precautions:	Ventilate area. Do not allow product to enter sewer or waterways.
Clean-up methods:	Do not use cloths for mopping up. Flood with water to complete polymerization and scrape off the floor. Cured material can be disposed of as non-hazardous waste.

7. HANDLING AND STORAGE

Handling:

Prevent contact with eyes, skin and clothing. Do not breathe vapor and mist. Wash thoroughly after handling. Avoid contact with fabric or paper goods. Contact with these materials may cause rapid polymerization which can generate smoke and strong irritating vapors, and cause thermal burns.

Storage:

Keep in a cool, well ventilated area away from heat, sparks and open flame. Keep container tightly closed until ready for use.
