

## AN-1623 LM3668 Evaluation Board

### 1 Introduction

The LM3668 evaluation board is a working demonstration of a synchronous buck-boost DC-DC converter. This document contains information about the evaluation board. For more details and electrical characteristics about the converter operation, see the device-specific data sheet.

### 2 Operating Range

- $V_{IN}$  range: 2.5 V to 5.5 V
- For 2.8 V/3.3 V and 3.0 V/3.4 V versions:
  - 1A maximum load current for  $V_{IN} = 2.8$  V to 5.5 V
  - 800mA maximum load current for  $V_{IN} = 2.7$  V
  - 600mA maximum load current for  $V_{IN} = 2.5$  V
- For 4.5 V/5 V version:
  - 1A maximum load current for  $V_{IN} = 3.9$  V to 5.5 V
  - 800mA maximum load current for  $V_{IN} = 3.4$  V to 3.8 V
  - 700mA maximum load current for  $V_{IN} = 3.0$  V to 3.3 V
  - 600mA maximum load current for  $V_{IN} = 2.7$  V to 2.9 V

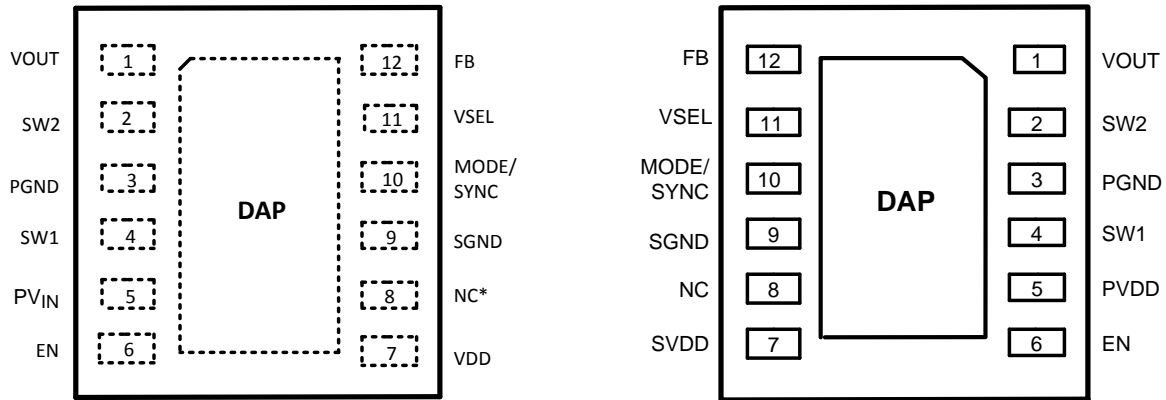

### 3 Package

WSO<sub>N</sub>-12 no-pullback (3 mm x 3 mm x 0.8 mm)

### 4 Typical Application

**Figure 1. Typical Application Circuit**

**NOTE:** The above figures are not to any actual scale.

## 5 Pin Descriptions

Pin No	Pin Name	Description
1	V <sub>OUT</sub>	Connect to output capacitor.
2	SW2	Switching Node connection to the internal PFET switch (P2) and NFET synchronous rectifier (N2).
3	PGND	Power Ground.
4	SW1	Switching Node connection to the internal PFET switch (P1) and NFET synchronous rectifier (N1).
5	PV <sub>IN</sub>	Supply to the power switch, connect to the input capacitor.
6	EN	Enable Input. Set this digital input high for normal operation. For shutdown, set low.
7	V <sub>DD</sub>	Signal Supply input. If board layout is not optimum an optional 1µF ceramic capacitor is suggested as close to this pin as possible.
8	NC	No connect. Connect this pin to SGND on PCB layout.
9	SGND	Analog and Control Ground.
10	MODE/SYNC	Mode = LOW, Automatic Mode. Mode= HI, Forced PWM Mode SYNC = external clock synchronization from 1.6MHz to 2.7MHz (When SYNC function is used, device is forced in PWM mode).
11	VSEL	Voltage selection pin; (i.e., 2.8 V/3.3 V option) Logic input low = 2.8 V and logic high = 3.3 V to set output Voltage.
12	FB	Feedback Analog Input. Connect to the output at the output filter.
DAP	DAP	Die Attach Pad, connect the DAP to SGND on PCB layout to enhance thermal performance. It should not be used as a primary ground connection.

## 6 Bill Of Materials

Component Name	Manufacturer	Specification	Case Size
LM3668	TI	WSN-12	3 mm x 3 mm x 0.8 mm
C <sub>IN</sub> = 10 µF	Taiyo-Yuden	JMK212BJ106K	0805(2012)
C <sub>OUT</sub> = 22 µF (2.8 V/3.3 V, 3.0 V/3.4 V)		JK212BJ226MG	0805(2012)
C <sub>OUT</sub> = 22 µF (4.5 V/5.0 V)		LMK212BJ226MMG	0805(2012)
C <sub>IN-V<sub>DD</sub></sub> = 4.7 µF		JMK212BJ475M	0805(2012)
Inductor	Coilcraft	LPS4018-222L	4mm x 4mm x 1.8mm

## 7 Operating Information

The LM3668 evaluation board is set for the following default positions:

- $V_{OUT} = 3.3\text{ V}$ , for  $V_{OUT} = 2.8\text{ V}$  move VSEL pin to Low via jumper
- SYNC mode = H (PWM mode), for auto mode, set SYNC = low (move jumper to inner position). Do not leave this pin floating.
- EN pin is tied to  $V_{IN}$  via a jumper
- It is not recommended to start up the device with full load at minimum input voltage

## 8 Evaluation Board Layout

LM3668EVB is a four-layer board designed to maximize the performance. Top layer consists of high current path; bottom layer is for low current and logic signals path. Inner layer 1 and layer 2 are dedicated for PGND (power GND) and SGND (analog and logic GND). For optimum performance, it is recommended to separate the PGND and SGND pins and join them together at the "star GND" on the PCB. The star GND traces on the PCB board should be close to the device power GND pin.

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
