# MAGLITE® PRO™ LED FLASHLIGHT

## Introducing the All New MAGLITE® PRO™ LED Flashlight -

POWERED BY 2 "D" ALKALINE BATTERIES

## Introducing the All New MAGLITE® PRO™ LED Flashlight -

The look of our original Maglite® D-Cell flashlight, introduced more than three decades ago, is now a classic of American industrial design. That iconic look is still seen in this newest member of the family.

But there's one big difference:  
The new Maglite® PRO™

houses a state-of-the-art LED light engine that combines awesome lumen output with surprisingly efficient power usage, offering levels of performance far beyond what was possible "back in the day."

- **CLASSIC SIMPLICITY** – Just push the button to switch the flashlight on and off; just turn the head to focus the beam.

- **MODERN POWER** – Next-generation LED for a whole new level of brightness.
