

Mini-Coax Cable Stripper - UST-175

The UST-175 is a three level coax stripper for mini coaxial cable (ComScope 73508, Belden 735A1, Cannon/ITT W58-124-9019-910 and similar cables). Blade is capable of making over 5000 cuts.

The mini strips 0.625" of the outer jacket on the first level, the second level strips the braid exposing 0.156" of dielectric, and the third level strips the dielectric exposing 0.156" of the 26 AWG center conductor.

Simple to use:

1. Squeeze the tool jaws open and insert the cable up to the stop
2. Allow the jaws to close
3. Holding the cable in one hand and the tool in the other, rotate the tool around the cable 4-6 times
4. Remove the tool and pull the stripped segments off the cable
5. Cable is ready for termination
