

McAfee Internet Security 2014

Comprehensive, award-winning PC security to freely explore online

You want to enjoy the benefits of connecting, surfing, and shopping online and don't want to think about security risks. At McAfee, we live and breathe digital security, relentlessly working to stay several steps ahead of the bad guys. Every second of every day, we focus on one thing: keeping your digital life safe, so that you can surf, shop, and socialize online with confidence.

Fend Off Viruses and Malware

High-performance scanning engine

(ENHANCED)—We built our next-generation scanning engine to guard your PC from the latest viruses, Trojans, spyware, rootkits, and other threats, all without seriously compromising battery life or slowing down your PC.

Safe searching and shopping

(ENHANCED)—With color-coded icons next to every search result, including popular social networking sites, you'll know if the site you're about to visit is safe.

Digital data message (ENHANCED)—

We provide information about the location of the blocked IP address and what makes the connection unsafe.

Home screen—Got a touch-friendly device?

Our new home screen is built for ease of use with these devices. And it still works great with a track pad or mouse, so navigating to common security tasks is a breeze on any device.

Security reports—We've redesigned the security report to bring you the information you need in visually interesting ways. The new report includes relevant images and links for an easier-to-understand snapshot of what's going on in the world of security.

Vulnerability scanner—If your operating systems (OS) and programs are out of date, you could be vulnerable to threats. The new vulnerability scanner checks your PC for missing updates, and then recommends solutions to keep you safe.

Malicious ads and popup protection—

Websites don't always have control over the ads they display. Sometimes, you might find a risky ad on a site you trust every day. McAfee automatically blocks suspect malicious ads to keep you protected.

System Requirements

Windows XP SP3 or higher (32-bit)
Windows Vista SP1 (32- and 64-bit)
Windows 7 (32- and 64-bit)
Windows 8 (32- and 64-bit)
512 MB RAM for XP
2 GB RAM for Vista, Windows 7, and Windows 8
500 MB free drive space
1 GHz processor

Internet Connection Required

High-speed connection recommended

Supported Browsers for Anti-phishing

Internet Explorer 7.0 or later
Firefox 3.5 or later
Google Chrome

Supported Email Programs

POP3—Windows Mail, Outlook Express, Outlook, Netscape, IncrediMail, Thunderbird, Becky, Shuriken
MAPI—Outlook
Web—MSN/Hotmail or email account with POP3 access

Required for Antispam Toolbar

Windows Mail or Outlook Express 6.0+
Outlook XP+
Thunderbird 5.0+
McAfee Anti-Spam also supports other POP3 email clients (without SSL) and web accounts

Block Spam and Unwanted Email

Antispam (ENHANCED)—All those unwanted emails aren't just annoying. They could be malicious. We'll filter out all the undesirable stuff to keep you and your inbox protected. And the antispam engine integrates with new technology to make sure the right emails are making it into your inbox.

Keep Your Family Safe

Parental controls—Worried about your kids seeing stuff they shouldn't? Parental controls let you block inappropriate sites with age-based rules and adjustable categories. You can even limit the amount of time they spend online and print reports for every user you've set up.

Surfing report—Find out what your kids have been up to online through the surfing report. You'll know when they log in, if they attempt to access forbidden sites, and how much time they spend online.
