

THE NEW ANTEX ST6A SOLDERING IRON STAND

The ***NEW*** ST6A is an industrially styled bench stand for ANTEX M, C, CS, XS, TCS, TC & SD soldering irons. Ideal for use when a fume extraction tube is used.

It is manufactured from high grade materials, suitable for use with soldering iron tip temperatures. It incorporates slip-resistant feet, and a ballast weight for added stability.

The innovative design ensures that the soldering iron handle temperature is kept to a minimum when the iron is placed in the stand for long periods.
