# OM11084 - Keil LPC1769 Evaluation Board

Demo Board Description

The Keil LPC1769 Evaluation Board allows you to quickly and easily evaluate the LPC176x family of microcontrollers. The microcontroller, board, and accompanying features make it a great starting point for your next Cortex-M3 project.

Populated with the LPC1769 to demonstrate LPC176x features, the LPC1769 board allows the evaluation of the high level integration and low power consumption of the LPC1769.

Order Number: OM11084

Features

- Color QVGA TFT LCD
- 10/100 Ethernet Port
- USB 2.0 Full Speed - USB, USB-OTG, and USB Host
- 2 CAN interfaces
- 2 Serial Ports
- SD/MMC Card Interface
- 5-position Joystick and push-button
- Analog Voltage Control for ACD Input
- Amplifier and Speaker
- Up to 70 GPIO
- Debug Interface Connectors

Descriptive Summary

Keil LPC1769 Evaluation Board

Keil's LPC1769 Evaluation Board lets you get up-and-running quickly in evaluating the superior performance and capability of the LPC1769. The LPC1769 is developed with an extensive set of peripherals that allow for a broad array of designs and applications.
