ECMF02-2HSMX6

ESD protected common mode filter for USB3.0 interface

Datasheet - production data

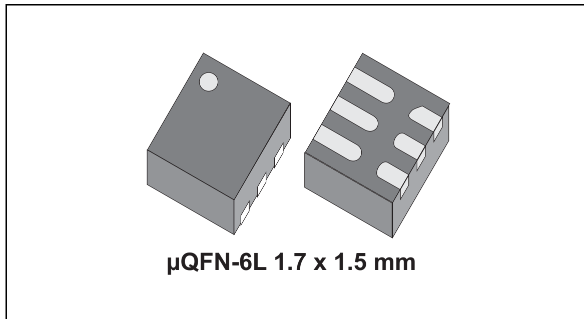

Figure 1. Pin out, top view

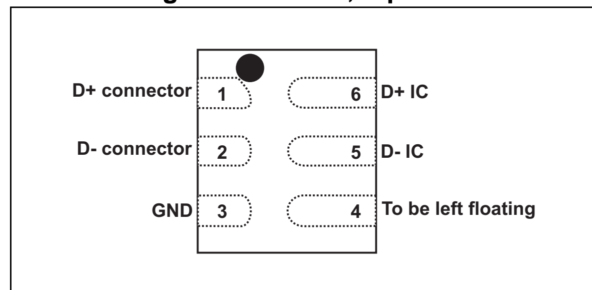


Features

- High common mode attenuation:
  - -10 dB @ 300 MHz
  - -20 dB @ 2.4 and 5 GHz
  - -15 dB from 500 MHz to 6 GHz
- Compliant with USB3.0 eye diagram
- Small and thin package 1.5 x 1.7 x 0.5 mm
- RoHS compliant.
- High reduction of parasitic elements through integration.
- ESD protection compliant with IEC 61000-4-2 level 4 standards (8 kV contact)

Benefits

- Suppress the common mode noise but keep signal integrity
- Low PCB space consumption.
- Save components count
- Make the application robust against ESD strikes from external environment

Description

The ECMF02-2HSMX6 is a highly integrated common mode filter designed to suppress EMI/RFI common mode noise on high speed differential serial buses like the USB3.0 transceiver.

Applications

Consumer and computer electronics featuring USB3.0 such as:

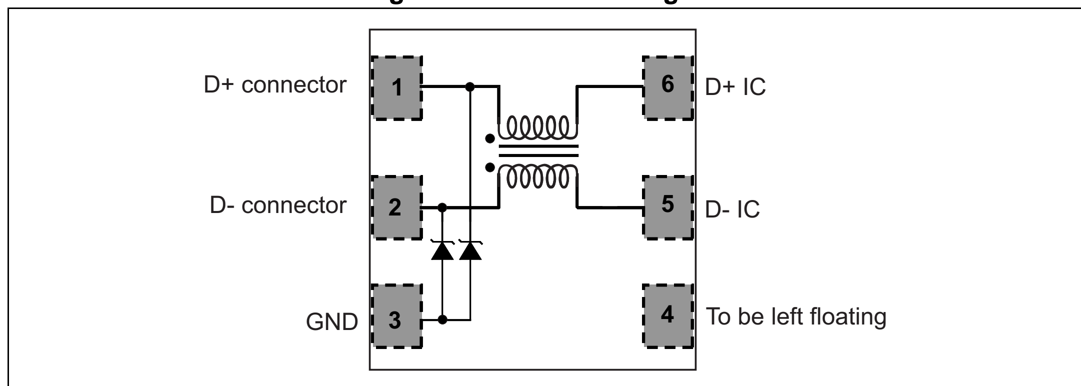
- Personal computer
- Notebook
- Tablet
- Set-top boxes
- PC graphic cards
- Telecom application

This is information on a product in full production. www.st.com

1 Functional description

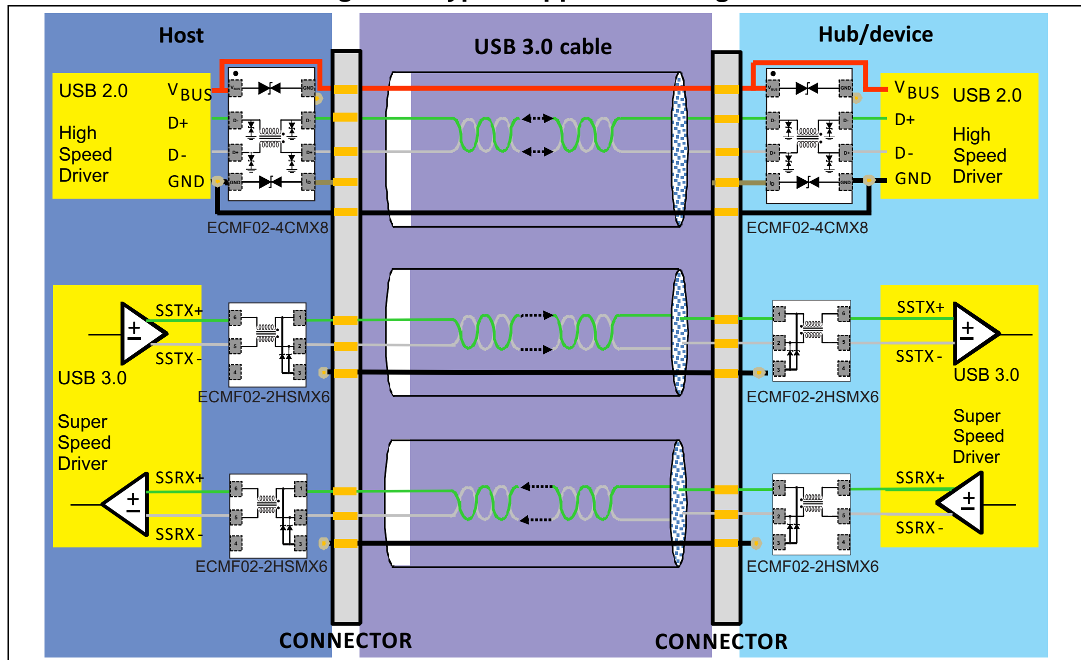
The ECMF02-2HSMX6 is an ESD protected common mode filter especially designed for USB3.0 Tx/Rx differential pair, for host and device. The USB3.0 is actually made of 3 differential pairs. The first differential pair supports the high speed USB mode (also called USB2.0 mode). The 2 other differential pairs are used to support the super speed USB mode in full duplex. Bit rate on super speed USB can reach 5 Gbps. The ECMF02-2HSMX6 is able to filter the common mode noise from 300 MHz to 6 GHz, helping to make the application compliant with the electromagnetic interference emission standard such as CISPR22 or FCC part 15, or EN55022 and avoiding antenna desense on mobile phones, WiFi/Bluetooth, GPS,/GNSS frequencies. At the same time, the ECMF02-2HSMX6 keeps the high speed signal integrity and provides an efficient ESD protection.

Figure 2. Functional diagram



A typical application diagram is shown in *Figure 3*. ST offers a global approach to USB3.0 interface by providing a comprehensive range of dedicated products.

Figure 3. Typical application diagram



2 Electrical Characteristics

Table 1. Absolute maximum ratings (limiting values)

Symbol	Parameter	Test conditions	Value.	Unit
V_{PP}	ESD discharge (pins 1 and 2) IEC 61000-4-2 level 4	Contact discharge	±8	kV
		Air discharge	±15	kV
I_{DC}	Maximum DC current		100	mA
T_{OP}	Operating temperature range		-40 to 85	°C
T_J	Maximum junction temperature		125	°C
T_{stg}	Storage temperature range		-55 to +150	°C

Figure 4. Electrical characteristics (definitions)

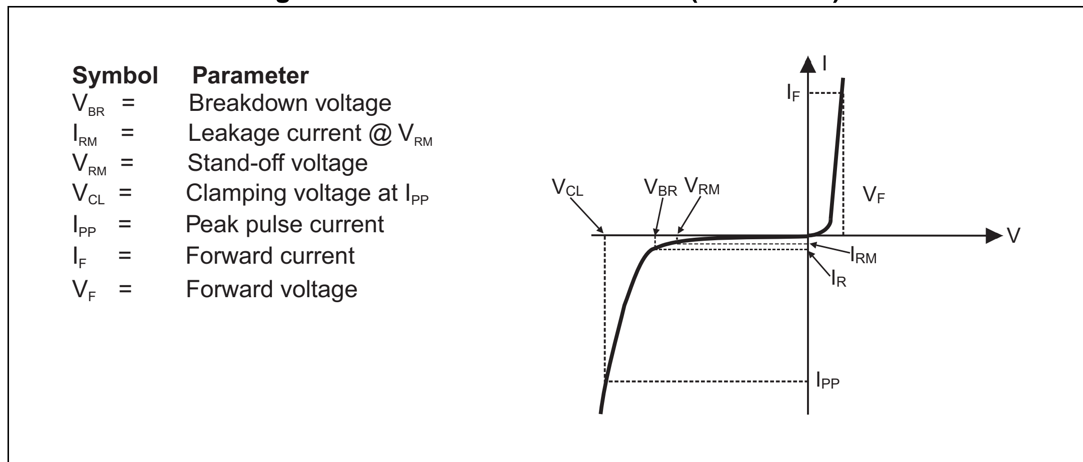


Table 2. Electrical characteristics (T_{amb} = 25 °C)

Symbol	Parameter	Test conditions	Min.	Typ.	Max.	Unit
V_{BR}	Breakdown voltage	I_R = 1 mA	6			V
I_{RM}	Reverse leakage	V_{RM} = 3 V			100	nA
R_{DC}	DC serial resistance			7	9	Ω

Figure 5 shows that USB3.0 devices and cables can interfere with radio frequency devices operating between 700 MHz and 5 GHz.

3 Package information

- Epoxy meets UL94, V0
- Lead-free package

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: *www.st.com*. ECOPACK® is an ST trademark.

4 Recommendation on PCB assembly

4.1 Stencil opening design

1. General recommendation on stencil opening design
   a) Stencil opening dimensions: L (Length), W (Width), T (Thickness).

Figure 28. Stencil opening dimensions

   b) General design rule
   Stencil thickness (T) = 75 ~ 125 µm

$$\text{Aspect Ratio} = \frac{W}{T} \geq 1,5$$

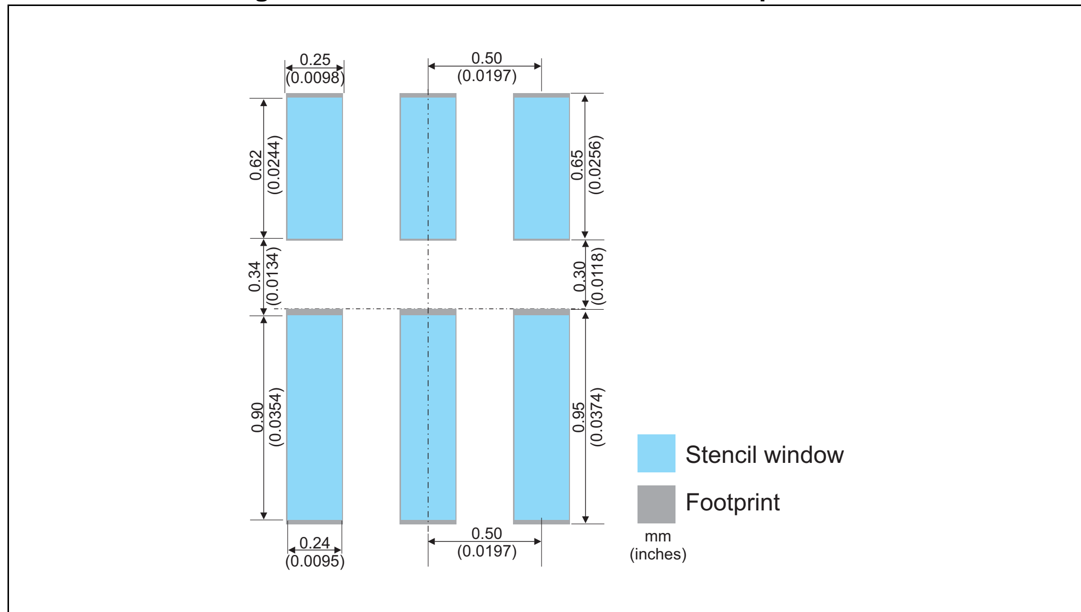
$$\text{Aspect Area} = \frac{L \times W}{2T(L + W)} \geq 0,66$$

2. Reference design
   a) Stencil opening thickness: 100 µm
   b) Stencil opening for leads: Opening to footprint ratio is 90%.

4.2 Solder paste

1. Use halide-free flux, qualification ROL0 according to ANSI/J-STD-004.
2. “No clean” solder paste recommended.
3. Offers a high tack force to resist component displacement during PCB movement.
4. Use solder paste with fine particles: powder particle size 20-45 µm.

Figure 29. Recommended stencil window position



4.3 Placement

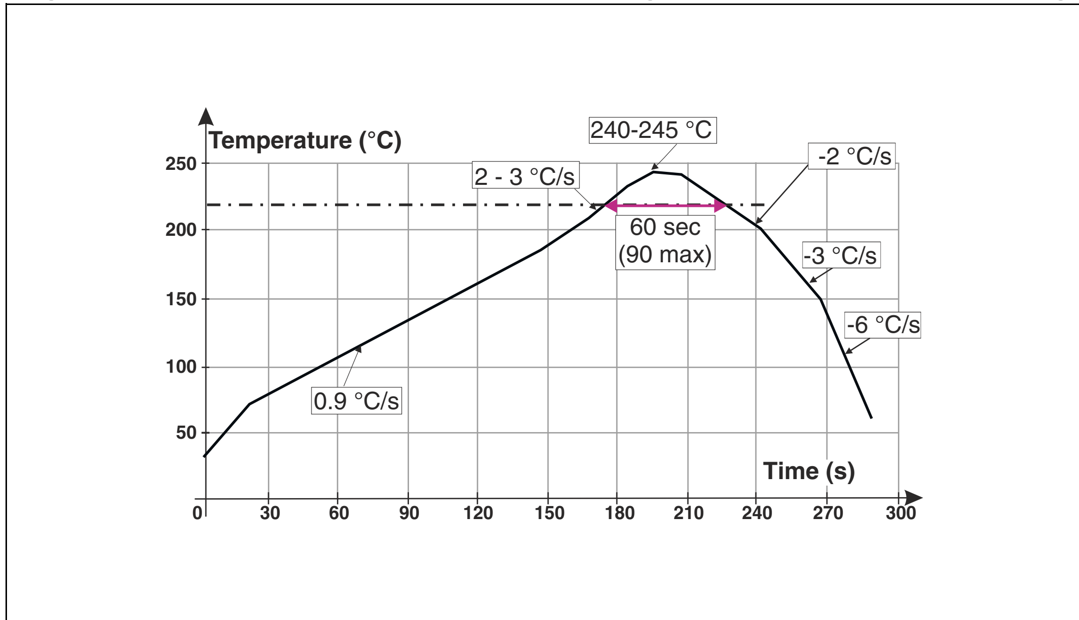
1. Manual positioning is not recommended.
2. It is recommended to use the lead recognition capabilities of the placement system, not the outline centering.
3. Standard tolerance of ± 0.05 mm is recommended.
4. 3.5 N placement force is recommended. Too much placement force can lead to squeezed out solder paste and cause solder joints to short. Too low placement force can lead to insufficient contact between package and solder paste that could cause open solder joints or badly centered packages.
5. To improve the package placement accuracy, a bottom side optical control should be performed with a high resolution tool.
6. For assembly, a perfect supporting of the PCB (all the more on flexible PCB) is recommended during solder paste printing, pick and place and reflow soldering by using optimized tools.

4.4 PCB design preference

1. To control the solder paste amount, the closed via is recommended instead of open vias.
2. The position of tracks and open vias in the solder area should be well balanced. The symmetrical layout is recommended, in case any tilt phenomena caused by asymmetrical solder paste amount due to the solder flow away.

4.5 Reflow profile

Figure 30. ST ECOPACK® recommended soldering reflow profile for PCB mounting



Note: Minimize air convection currents in the reflow oven to avoid component movement.

4.6 PCB layout recommendation

Figure 31. PCB footprint recommendation

Please Read Carefully:

Information in this document is provided solely in connection with ST products. STMicroelectronics NV and its subsidiaries (“ST”) reserve the right to make changes, corrections, modifications or improvements, to this document, and the products and services described herein at any time, without notice.

All ST products are sold pursuant to ST’s terms and conditions of sale.

Purchasers are solely responsible for the choice, selection and use of the ST products and services described herein, and ST assumes no liability whatsoever relating to the choice, selection or use of the ST products and services described herein.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted under this document. If any part of this document refers to any third party products or services it shall not be deemed a license grant by ST for the use of such third party products or services, or any intellectual property contained therein or considered as a warranty covering the use in any manner whatsoever of such third party products or services or any intellectual property contained therein.

UNLESS OTHERWISE SET FORTH IN ST’S TERMS AND CONDITIONS OF SALE ST DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE USE AND/OR SALE OF ST PRODUCTS INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION), OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.

ST PRODUCTS ARE NOT DESIGNED OR AUTHORIZED FOR USE IN: (A) SAFETY CRITICAL APPLICATIONS SUCH AS LIFE SUPPORTING, ACTIVE IMPLANTED DEVICES OR SYSTEMS WITH PRODUCT FUNCTIONAL SAFETY REQUIREMENTS; (B) AERONAUTIC APPLICATIONS; (C) AUTOMOTIVE APPLICATIONS OR ENVIRONMENTS, AND/OR (D) AEROSPACE APPLICATIONS OR ENVIRONMENTS. WHERE ST PRODUCTS ARE NOT DESIGNED FOR SUCH USE, THE PURCHASER SHALL USE PRODUCTS AT PURCHASER’S SOLE RISK, EVEN IF ST HAS BEEN INFORMED IN WRITING OF SUCH USAGE, UNLESS A PRODUCT IS EXPRESSLY DESIGNATED BY ST AS BEING INTENDED FOR “AUTOMOTIVE, AUTOMOTIVE SAFETY OR MEDICAL” INDUSTRY DOMAINS ACCORDING TO ST PRODUCT DESIGN SPECIFICATIONS. PRODUCTS FORMALLY ESCC, QML OR JAN QUALIFIED ARE DEEMED SUITABLE FOR USE IN AEROSPACE BY THE CORRESPONDING GOVERNMENTAL AGENCY.

Resale of ST products with provisions different from the statements and/or technical features set forth in this document shall immediately void any warranty granted by ST for the ST product or service described herein and shall not create or extend in any manner whatsoever, any liability of ST.
