Wi-Fi Client Module Development Kit

Part Number: DM182020

The Microchip WiFi Client Module Development Kit 1 is designed to enable the user to quickly and easily connect to a cloud based server such as Amazon AWS. The kit includes the WCM demo board utilizing a Microchip WiFi Module MRF24WG0MA and an application microcontroller PIC32. The device allows commissioning to router and then connects to an Amazon AWS server. The AWS account and AMI must be established prior to module commissioning. Microchip offers a free AMI image on Amazon AWS.
