

60W power supply with Touch dimmer for LED strip lighting

Part SW4487W-C4229-D-LED-TDS

CPC order code LA04954

A high quality inline power supply with integral UK mains lead, moulded into the case to help prevent accidental disconnection from the mains and fixing lugs so the PSU can be secured down to any flat surface (indoor use only). Supplied with the PSU is a compatible touch dimmer specifically engineered for single colour LED strip lighting allowing smooth dimming up and down and on/off control

Supplying 12vdc constant voltage, at up to 5 amps max (no minimum load) this unit is rated at 60W so is suggested for use to power and control up to 48W of LED strip lighting (allowing 20% headroom to maximise reliability and life of the unit)

48W = 10 metres of 4.8W per metre LED strip or 5 metres of our 9.6W per metre LED strip
