

ROTACONNECT™ ROTATABLE BOARD-TO-BOARD CONNECTOR

OVERVIEW

A unique rotatable board to board SMT connector that can be used to support perpendicular, coplanar and angled connections, in multiple mating/un-mating directions.

The hermaphroditic "mates to itself" design enables mating at any angle between +90° and -60° which enables connector to be placed anywhere on PCB. This is available in 2 and 4 positions.

This design allows the use of a single part number which will comprise both male and female contacts. The high temperature grade housing material is reflow soldering compatible. The tape and reel packaging permits vacuum pick and place application.
