

# . ALL THE RIGHT NOTES.

From the deep, satisfying lows, through the crisp, clear highs, the powerful, high-sensitivity drivers in the Logitech UE 4000s make your music come alive with depth, authenticity and emotion. And the detachable cable is designed to reduce tangling and friction.

# . CONTROL IT. SHARE IT.

The mic and on-cord controls let you answer calls with just one touch, change tracks and adjust volume—all without touching your iPhone or iPod. And since sometimes the music is too good to keep to yourself, we've included a shareable splitter among the accessories that come with your Logitech UE 4000s.

# . COOL AND COMFORTABLE.

Plush, memory foam cushions, breathable, soft-as-leather surfaces, and a compact, on-ear design. The Logitech UE 4000s are made to feel great and go where you go because you've got the perfect playlist for every place and every occasion. And since they're built with top-quality materials, these will be your favorite headphones for a long time to come.
