100% Wireless Alarm System - SG1100ARM2-434

Get your home protected easily and quickly with our remote control operated wirefree alarm system.

- Available in 434MHz only
- Add as many wirefree sensors as you require
- Fully expandable to control panel operation using the MU6450TX
- Can be set up in under 1 hour
- Complies with British Standards BS6706 and BS6799 Class 1 to Class IV Part A
- Full tamper and radio jamming protection
- No extras needed - ready to set up out of the box
- Can be set up in under an hour
- Remote control operated for ease of use
- Comes complete with PIR movement detector, 2 magnetic door contacts and remote control

SolarGuard is the original solar powered wireless alarm AEI Security and was first registered with the UK patent office in 1996.

You choose how you want to configure your system and don't worry about changing your mind later because weve designed this kit to be upgraded to full control panel operation.

Buy this system and you are on the right road to protection regardless of what you choose in the future.
