

NZXT Phantom 410

NZXT introduces the descendant of the revolutionary Phantom, the Phantom 410. The beautiful and sleek Phantom design set the trend of all white chassis and idealized optimal expansion and cooling. In comparison to its predecessor, the Phantom 410 delivers more value for every dollar spent and possesses an acrylic window that allows gamers to admire the power of their rig.

The Phantom 410 features an innovative right mounted HDD rails, a solution for easy hard drive replacement. This mid tower comes equipped with a dual radiator water cooling solution with a clearance of 30mm, an interior pivot 120mm/140mm fan slot, the capability of installing up to 8 fans, and a single 30W fan control. The Phantom comes with up-to-date internal 2x USB 3.0 headers that directly connect to the motherboard. Be the envy of all PC gamers - the Phantom 410 is bringing sexy back.

Features

- Clearance for top 240mm dual radiator for water cooling solutions
- Adjustable interior pivot 120mm/140mm fan slot for directional air flow
- Removable HDD cage to allow more room for extended video cards
- Innovative right mounted HDD rails for easy hard drive replacement
- Single 120mm/140mm side fan with acrylic window for interior viewing and cooling
- Front Internal 2x USB 3.0 headers, 2x USB 2.0, audio and microphone input
- 30W 3-step fan control for setting up your system for silence or performance
- Wire management support up to 25mm space for easy cable management
- Screw-less 5.25" and HDD trays that secures 2.5" SSD
- Cooling capability of up to eight fans (2x 120mm and 1x 140mm LED fan included)
