

## **Source 210 Midtower**

Gamers spend approximately \$60 per game, buy X number of video game titles per year. You know what it's like...it adds up very quickly. Sometimes gamers are starving college students, sometimes life happens; and in the end the green keeps flying away. NZXT's Source 210 is here to provide the basic chassis to house your rig. It's modest and minimalist, but it contains the essentials for performance. It's the chassis you can afford.

The Source Series is NZXT's chassis line designed to be a starting block for first time builders or a stepping stone for those who want to upgrade their rig later on. Each chassis faithfully serves their purpose as an affordable, memorable part of your system building experience; it may just be a keeper.

### **Features**

- Bottom Mounted PSU – Positioned for the most effective PSU ventilation
- Wire Management Support – 20mm space for a neat and easy build
- Aluminum Textured Panel – Accents the chassis for a clean, modern look and feel
- Dual 120mm Front Intake – Takes advantage of front facing HDD bays for excellent airflow
- Maximum Cooling Potential – Eliminate heat by installing up to seven 120mm fans
- Also fits 2 x 120/140mm fan
