

## PHYSICAL PROPERTIES

- Nut, Post and Collar: Brass
- Nut and Collar Finish: Nickel Tin
- Post Finish: Tin Plated
- O-Rings: Ethylene Propylene

## ELECTRICAL PROPERTIES

- Return Loss:  $\geq -30$  dB up to 1GHz Typical
- Insertion Loss:  $\leq -0.18$  dB up to 1GHz Typical
- RFI Shielding: -90 dB Typical (60% Bonded Foil)

## MECHANICAL PROPERTIES

- Cable Retention: 40 lbs min.  
Complies to SCTE IPS-SP-401
- Cable Insertion Force: <20 lbs

## ENVIRONMENTAL PROPERTIES

- Temperature Rating: -40°F (-40°C) to 140°F (60°C)
- Moisture Migration: Passes ANSI/SCTE 60 2004

## SNAP-N-SEAL® “F” SERIES MALE ONE-PIECE COMPRESSION CONNECTORS

Thomas & Betts Snap-N-Seal® One-Piece Compression Connectors, feature a user-friendly, pre-positioned and detachably coupled plastic sleeve, incorporating time-proven advantages for a reliable connection.

Snap-N-Seal® One Piece Connectors use the same proven 360° compression design and installation tools as other Snap-N-Seal® products

- To reduce assembly time and simplify installation, the plastic sleeve is pre-positioned and detachably coupled to the connector body.
- True 360° compression onto cable ensures superior RF shielding performance, -90 dB effective shielding (typical on 60% bonded foil cable).
- Permanently stamped part numbers and color-coded sleeves for easy identification before and after installation.
- Installation requires one-step 1/4" - 1/4" cable preparation and standard compression tools used for all 59 & 6 series Snap-N-Seal® product families.
- Quad-sealed system prevents moisture migration.
- Incorporates a NiTin finish plus UV resistant plastic and O-rings to provide a reliable, environmentally sealed product.
- Superb return loss performance of -30 dB to 1GHz.
- Cable retention exceeds 40 lb. minimum as specified by the SCTE.

## ULTIMATE™ SNAP-N-SEAL® “F” SERIES COMPRESSION CONNECTOR

Thomas & Betts introduces the Ultimate™ Snap-N-Seal® Compression Connector. One connector for 6 Series SCTE specification drop cables including 60% braid, tri-shield and quad shield.

Look for the classic design of this Thomas & Betts connector. With its user-friendly, pre-positioned and detachably coupled plastic sleeve, the Ultimate™ Snap-N-Seal® Connector incorporates time-proven advantages for a reliable connection.

- To reduce assembly time and simplify installation, the plastic sleeve is pre-positioned and detachably coupled to the connector body.
- The plastic sleeve's separability from the connector body further simplifies difficult installations.
- True 360° compression onto cable ensures superior RF shielding performance, -90 dB effective shielding (typical on 60% bonded foil cable).
- Installation requires one-step 1/4" - 1/4" cable preparation and standard compression tools used for all 59 & 6 Series Snap-N-Seal® product families.
- Quad-sealed system prevents moisture migration.
- Incorporates a NiTin finish plus UV resistant plastic and O-rings to provide a reliable, environmentally sealed product.
- Cable retention exceeds 40 lb. minimum as specified by the SCTE.

### PHYSICAL PROPERTIES

## ULTIMATE™ SNAP-N-SEAL® RIGHT ANGLE "F" MALE ONE PIECE COMPRESSION CONNECTOR

Thomas & Betts introduces the right angle Ultimate™ Snap-N-Seal® compression connector – one connector for 6 series SCTE specification drop cables including 60% braid, tri-shield and quad shield.

The 90° Ultimate™ Snap-N-Seal® connector is designed for tight fitting drop applications or situations where space is a premium.

### PHYSICAL PROPERTIES

- Body Components: Brass
- Nut and Collar Finish: NiTin Plated
- Post Finish: Tin Plated
- Terminal Finish: Silver Plated
- O-Ring: Ethylene Propylene

### ELECTRICAL PROPERTIES

- Return Loss:  $\geq -30$  dB up to 1 GHz typical
- Insertion Loss:  $\leq -0.18$  dB up to 1 GHz typical
- RFI Shielding: -90 dB Typical (60% Bonded Foil)

### MECHANICAL PROPERTIES

- Cable Retention: 40 pounds minimum
- Cable Insertion Force: <20 pounds

### ENVIRONMENTAL PROPERTIES

- Temperature Rating: -40°F (-40°C) to 140°F (60°C)
- Salt Spray Exposure: Passes ASTM B 117, 1000 hours
- Moisture Migration: Passes ANSI/SCTE 60 2004

- To reduce assembly time and simplify installations, the plastic sleeve is pre-positioned and detachably coupled to the connector body.
- The plastic sleeve's separability from the connector body further simplifies difficult installations.
- True 360° compression onto cable ensures superior RF shielding performance, -90 dB effective shielding (typical on 60% bonded foil cable).
- Installation requires one-step 1/4" – 1/4" cable preparation and standard compression tools used for all 59 & 6 series Snap-N-Seal product families.
- Quad-sealed system prevents moisture migration.
- Incorporates a RoHS Compliant, NiTin Plating plus UV resistant plastic and O-rings to provide a reliable, environmentally sealed product.
- Cable retention exceeds 40 lb. minimum as recommended by the SCTE.

### Quad-sealed System

1. Thread Protector
2. Internal O-Ring

## Snap-N-Seal® “F” Series Male Environmentally Sealed Connectors for Series 59 & 6 Cables

## PROPERTIES

### PHYSICAL

NUT, POST AND COLLAR: BRASS CDA360

NUT AND COLLAR FINISH: CADMIUM PLATED WITH

IRIDESCENT CHROMATE COATING

POST FINISH: TIN PLATED

O-RING: ETHYLENE PROPYLENE

### ELECTRICAL

RETURN LOSS:  $\geq -30$  dB UP TO 1 GHz TYPICAL

INSERTION LOSS:  $\leq -0.18$  dB UP TO 1 GHz TYPICAL

RFI SHIELDING: -95 dB TYPICAL (60% BONDED FOIL CABLE)

### MECHANICAL

CABLE RETENTION: 40 LBS. MIN. COMPLIES TO SCTE IPS-SP-404

### ENVIRONMENTAL

TEMPERATURE RATING: -40° F (-40°C) TO 140° F (60°C)

LRC Snap-N-Seal® connectors are environmentally sealed to protect drops from harsh environments. Through a unique 360° compression process, Snap-N-Seal® connectors also offers the signal leakage protection required for today's systems.

### DESIGN ADVANTAGES

- Quad-sealed system prevents moisture from migrating into the connection.
- Connectors manufactured from high quality 360 brass, cadmium plated with iridescent chromate coating for maximum corrosion resistance.
- Design incorporates UV resistant plastic and O-rings providing a reliable, environmentally sealed product.
- 1/4"-1/4" cable preparation is standard.
- Multiple tool options make installation fast, easy and reliable.
- Product number is permanently stamped on connectors for easy identification.

## SNAP-N-SEAL® “F” SERIES MALE INDOOR ONE-PIECE COMPRESSION CONNECTORS

Adapted from our environmentally sealed, indoor/outdoor Snap-N-Seal® line, the Indoor F Series Snap-N-Seal® compression connectors offer the same high shielding effectiveness, low insertion loss and excellent return loss specifications, but with a knurled nut design that is both unique in appearance and makes indoor installation easy for installers and subscribers.

- Large 1/2" diameter knurled “subscriber friendly” nut design provides additional leverage for connections to TVs, VCRs and Set-Top Converters.
- Installation requires one-step 1/4"-1/4" cable preparation and the standard compression tools used for all 59 and 6 series Snap-N-Seal® product families, which saves time and reduces the chance for errors.
- True 360° compression onto cable ensures optimum RF shielding performance, -90 dB effective shielding (typical on a 60% braid cable), without performance degradation experienced by all crimp style products over time.
- Superb return loss performance of -30 dB up to 1GHz.
- Cable retention exceeds 40 lb. minimum as specified by the SCTE.
- Permanently stamped part numbers and color-coded sleeves for easy identification before and after installation.

### PHYSICAL PROPERTIES

- Nut, Post and Collar: Brass
- Nut Finish: Gold (SNS6IG) NiTin (SNS6I)
- Collar Finish: NiTin
- Post Finish: Tin plated
- O-Ring: Ethylene Propylene

### ELECTRICAL PROPERTIES

- Return Loss: -30 dB up to 1 GHz typical
- Insertion Loss: -0.18 dB up to 1 GHz typical
- RFI Shielding: -90 dB typical (60% bonded foil cable)

### MECHANICAL PROPERTIES

- Cable Retention: 40 lbs. min. Complies to SCTE IPS-SP-404
- Cable Insertion Force: < 20 lbs.

### ENVIRONMENTAL PROPERTIES

- Temperature Rating: -40° F (-40° C) to 140° F (60° C)

## LRC® SNAP-N-SEAL®

### “F” Series Male Indoor Compression Connectors

Adapted from our environmentally sealed, indoor/outdoor LRC® Snap-N-Seal® line, the Indoor F Series Snap-N-Seal® compression connectors offer the same high shielding effectiveness, low insertion loss and excellent return loss specifications, but with a knurled nut to make indoor installation easy for installers and subscribers. Connectors that are not environmentally sealed should not be used outdoors.

#### DESIGN ADVANTAGES

- Large 1/2” diameter knurled “subscriber friendly” nut provides additional leverage over standard 7/16” hex nut, ensuring RF tight connections to TVs, VCRs and Set-Top Converters.
- Installer can use a standard 7/16” hex for wrench tight installations.
- Installation requires one-step 1/4”-1/4” cable preparation and the standard compression tools used for all 59 and 6 series Snap-N-Seal® product families, which saves time and reduces the chances for errors.
- True 360° compression onto cable ensures optimum RF shielding performance, -95 dB effective shielding (typical on a 60% braid cable), without performance degradation experienced by all crimp style products over time.
- Superb return loss performance of -30 dB up to 1GHz.
- Cable retention exceeds 40 lb. minimum as specified by the SCTE.
- A clear chromate finish, permanently stamped part numbers and color-coded sleeves make the connector easy to identify before and after installation.
- The indoor Snap-N-Seal® system includes jumper cable assemblies, which are the best choice for digital boxes and cable modems.

#### PHYSICAL PROPERTIES

NUT, POST AND COLLAR: BRASS CDA360  
NUT AND COLLAR FINISH: CADMIUM PLATED WITH CLEAR CHROMATE COATING  
POST FINISH: TIN PLATED  
O-RING: ETHYLENE PROPYLENE

## SNAP-N-SEAL® RCA TYPE MALE COMPRESSION CONNECTORS

Extending the use of our Snap-N-Seal® technology, Thomas & Betts introduces the Snap-N-Seal® RCA connector. Designed to interface with all standard RCA female jacks and utilizing standard or tri-shield SCTE specification 6 series drop cable, this product gives the installer maximum flexibility for creating and placing audio cables in home entertainment systems.

### PHYSICAL PROPERTIES

- Body Components: Brass
- Body Finish: NiTin
- Terminal/contact: Brass Beryllium Copper
- Insulators: TPX

### ELECTRICAL PROPERTIES

- Return Loss: -30 dB up to 20 MHz Typical
- Insertion Loss: -0.05 dB up to 20 MHz Typical
- RFI Shielding: -120 dB up to 20 MHz Typical

### MECHANICAL PROPERTIES

- Cable Retention : 40 lbs min. Complies to SCTE IPS-SP-404
- Cable Insertion Force: <20 lbs

### ENVIRONMENTAL PROPERTIES

- Temperature Rating: -40°F (-40°C) to 140°F (60°C)

- Features Snap-N-Seal® technology for simple and reliable installations.
- Designed to interface with RCA female (JACK) per IEC Specification 60603-14.
- Cadmium plated connector body and precision integral contact provide maximum reliability.
- Installation requires one-step 1/4"-1/4" cable preparation and standard compression tools used for all 59 and 6 series Snap-N-Seal® product families.
- Color coded sleeves based on industry standards for RCA connector applications.

# SNAP-N-SEAL® ONE-PIECE BNC COMPRESSION CONNECTORS

These connectors are designed for applications using Series 59, Series 59 Quad Shield, Series 6 and Series 6 Quad Shield SCTE specification coaxial cables. In addition the 59 Series BNC connectors are designed for applications using specific Broadband Headend cables and Digital Video cables.

- High performance, 75 ohm Snap-N-Seal® BNC Male connectors feature precision coaxial contacts for demanding bandwidth applications.
- True 360 degree compression onto cable ensures optimum RF shielding performance, -65dB effective shielding.
- BNC Male Plug interface is designed to nominal Mil Spec C-39012 with 75 ohm characteristic impedance.
- Integral silver-plated contact and Snap-N-Seal® design ensures ease of installation and reliable, high frequency return loss performance of -30dB to 1 GHz.
- Installation requires one-step 1/4" - 1/4" cable preparation and standard compression tools used for all 59 & 6 series Snap-N-Seal® product families, saving installation time.

## SNAP-N-SEAL® BNC, RCA & F MALE COMPRESSION CONNECTORS FOR HDTV AND PRECISION VIDEO CABLE

Extending the use of our Snap-N-Seal® technology, Thomas & Betts introduces BNC, RCA and F Male compression connectors designed for use in Headend and jumper applications on HDTV and precision video cables.

With space at a premium and the exacting demands of digital television, using a Snap-N-Seal connector in conjunction with precision HDTV cable will help with your wire management needs.

### PROPERTIES BNC

- Body: Nickel plated Brass
- BNC Nut: Nickel plated Zinc Alloy
- Terminal Contact: Silver plated Beryllium Copper
- Insulators: TPX
- Return Loss: -30 dB up to 1 GHz typical
- Insertion Loss: -0.3 dB up to 1 GHz typical
- RFI Shielding: -60 dB typical (60% + bonded foil)

### RCA

- Body: NiTin plated Brass
- RCA Interface: Decorative Gold plated Brass
- Terminal Contact: Silver plated Beryllium Copper
- Insulators: TPX
- Return Loss: -30 dB up to 20 MHz typical
- Insertion Loss: -0.3 dB up to 20 MHz typical
- RFI Shielding: -65 dB typical (60% + bonded foil)

### F MALE

- Nut & Collar: NiTin plated Brass
- Return Loss: -30 dB up to 1 GHz typical
- Insertion Loss: -0.3 dB up to 1 GHz typical
- RFI Shielding: -80 dB typical (60% + bonded foil)

### PROPERTIES (TYPICAL TO BNC, RCA & F MALE)

- Post: Tin plated Brass
- Cable Insertion Force: 20 lbs. maximum
- Cable Retention Force: 40 lbs. minimum
- Temperature Rating: -40°F(-40°C) to 140°F(60°C)

- Simple, quick installation using the standard SNSUTL Snap-N-Seal installation tool and CSTMV596 cable stripping tool
- Nearly 2 decades of proven compression connector experience incorporated in a design for use in HDTV and headend applications
- True 360 degree compression onto cable ensures superior RF shielding performance
- To reduce assembly time and simplify installation, the plastic sleeve is pre-positioned and detachably coupled to the connector body
- The BNC male plug interface is designed to nominal Mil Spec C-39012 with 75 ohm characteristic impedance
- The RCA type connector is designed to interface with standard RCA-type female jacks
- Connectors fit SCTE specification mini cables for standard braid

**Application:** Cables meeting SCTE Specification IPS SP 009 for single braid, tri-shield or quad-shield flexible 75 ohm mini series cable, or equivalent.

## SNAP-N-SEAL® ENVIRONMENTALLY SEALED SPLICE CONNECTORS

### PHYSICAL PROPERTIES

- Body: NiTin plated Brass
- Post: Tin plated Brass
- Terminal Contact: Tin plated Copper Alloy
- Insulators: Polypropylene
- O-Rings: Ethylene Propylene

### ELECTRICAL PROPERTIES

- Return Loss: -12 dB up to 1 GHz typical
- Insertion Loss: -0.18 dB up to 1 GHz typical
- RFI Shielding: -90 dB typical (60% + bonded foil)

### MECHANICAL PROPERTIES

- Cable Insertion Force: 20 lbs. maximum
- Cable Retention Force: 40 lbs. minimum per SCTE IPS-SP-401

### ENVIRONMENTAL PROPERTIES

- Temperature Rating: -40°F(-40°C) to 140°F(60°C)
- Salt Fog: Passes 1000 hours ASTM B 117
- Moisture Migration: Passes ANSI/SCTE 60 2004

With its integral center contact, the Thomas & Betts Snap-N-Seal® Splice Connector ensures reliable, high frequency return loss performance for midspan and direct burial drop splices.

Snap-N-Seal® Splice Connectors use the same proven 360° compression design, installation tools and procedures as other Snap-N-Seal® products.

- To reduce assembly time and simplify installation, the plastic sleeve is pre-positioned and detachably coupled to the connector body
- True 360° compression onto cable ensures superior RF shielding performance, -90 dB effective shielding (typical on 60% bonded foil cable)
- Installation requires one-step 1/4" - 1/4" cable preparation and standard compression tools used for all 59 & 6 Series Snap-N-Seal® product families
- Quad-sealed system prevents moisture migration
- Six-point seal system prevents moisture migration
- Incorporates a NiTin finish plus UV resistant plastic and O-Rings to provide a reliable, environmentally sealed product
- Cable retention exceeds 40 lb. minimum as specified by the SCTE
- For direct burial applications, recommend Shrink-Kon® heat shrink tubing #HS12-6L or Kold-N-Klose® sleeve material #TBT2010

IPS-SP-404  
CABLE INSERTION FORCE: <20 LBS.

### ENVIRONMENTAL

TEMPERATURE RATING: -40°F (-40°C) TO 140°F  
(60°C)

The Snap-N-Seal® headend, cable to "F" female precision connector is designed for use in space-limited applications such as Headend Video Combiners. It is a single connector, thus eliminating the need for separate "F" male and panel mount "F" splice connectors.

Specifically designed for applications using CommScope® series F59HEC-2 Headend Cable or Times Fiber Communications, Inc. 02240V and 02241V Headend Cables.

### DESIGN ADVANTAGES

- Incorporates silver plated precision center contact providing high frequency performance.
- Superb Return Loss performance of -30dB up to 1 GHz.
- Extended panel mount thread length of .458" allows for thick panel mounting.
- Installation requires one-step 1/4" - 1/4" cable preparation and standard compression tools used for all 59 & 6 series Snap-N-Seal® product families, saving installation time.
- Optional panel mounting hardware includes Lock Washer 6155LW or Flat Washer 6155 plus 1/2" Hex Panel Nut 6150.

## THREAD PROTECTORS

Thomas & Betts thread protectors provide an environmental weather seal for all “F” male connectors in outdoor applications. Thread protectors provide a superior moisture and RF seal for a quality connection to any “F” port.

- Prevents moisture migration from damaging the connector interface
- UV and Ozone resistant for a reliable environmental seal
- No tools required for installation
- Passes Bellcore GR-1503-CORE, Chemical Resistance for Outdoor Connectors

### PHYSICAL PROPERTIES

- Material: Advanced Polyvinyl Chloride Polymer

### MECHANICAL PROPERTIES

- Brittleness Point: -125° F (-87° C)
- Tensile Strength: 1,170 psi
- Chemical Test: Bellcore GR-1503-CORE
- Moisture Migration: Passes SCTE IPS-TP-013 (double ended test)

## SNAP-N-SEAL® “F” CONNECTOR FOR COMMScope QR® 320

Thomas & Betts Snap-N-Seal® QR320 connector is designed for SDU/MDU applications and can be installed on either flooded or non-flooded QR 320 cables. This connector features a non-metallic post, which reduces craft sensitivity of the cable to connector interface.

- Featuring Snap-N-Seal® technology for consistent, reliable connections
- Integral precision Auto Seize® technology enables good contact with the center conductor
- True 360° compression onto cable ensures superior environmental seal
- Cable preparation requires the use of cable coring tools (7/16" center conductor exposure, 3/8" aluminum sheath exposure, 9/16" core)
- Easy and quick to install with standard compression tools used for Snap-N-Seal 7 & 11 Series product families
- Quad sealed system prevents moisture migration

### PHYSICAL PROPERTIES

- Body: Brass
- Body Finish: Nickel-Tin
- Terminal Contact: Brass with Tin Plate

### ELECTRICAL PROPERTIES

- Insulation Resistance: >5000 mega-ohms @ 100 VDC
- Dielectric Strength: Complies to Bellcore GR-2846-Core, Generic Requirements for Coaxial Distribution Connectors (1Kv RMS for 1 minute)
- Return Loss: -30dB Typical
- Insertion Loss: -.3 dB Typical
- RFI Shielding: -92dB Typical

### MECHANICAL PROPERTIES

- Cable Retention: >100 LBS

### ENVIRONMENTAL PROPERTIES

- Temperature Rating: -40° F (-40° C) to 140° F (60° C)
- Salt Fog: Passes 1000 hours ASTM B 117

## LRC®

### Precision F81 Connectors

Thomas & Betts LRC precision F81 connectors are high performance splice connectors designed for the demands of today's broadband networks. These connectors provide increased return loss performance up to 4 GHz and have a large, captive pin contact area for greater reliability.

#### DESIGN FEATURES

- Operate over a wide variety of frequencies (DC to 3 GHz)
- High return loss – meets requirements for DBS (Direct Broadcast Satellite) and exceeds SCTE minimum specification
- Flat port ends on both sides per SCTE specifications for flatness and aperture
- Multi-point seizing pin enables lower contact resistance and higher current handling capability
- Beryllium copper seizing pin insures a greater holding force and maintains a higher spring tension over repetitive insertions
- Accepts a wide range of cable center conductor sizes

#### TECHNICAL SPECIFICATION

##### PHYSICAL PROPERTIES

BODY COMPONENTS: BRASS  
BODY FINISH: NICKEL  
SEIZING PIN: BERYLLIUM COPPER

##### ELECTRICAL PROPERTIES

FREQUENCY RANGE: DC-3 GHz  
RETURN LOSS: >35 dB (1 GHz)  
>30 dB (2 GHz)  
>26 dB (3 GHz)  
INSERTION LOSS: <0.1 dB (1 GHz)  
<0.2 dB (2 GHz)  
<0.3 dB (3 GHz)  
CONTACT RESISTANCE: <10 MILLI-OHMS

##### MECHANICAL PROPERTIES

HOLDING FORCE: >180 GRAMS (INITIAL)  
>120 GRAMS\*  
THREADS: 3/8-32 UNEF  
MAX TIGHTENING: 50 IN-LBS

\*AFTER 50 INSERTIONS OF RG6

KF81DI	Precision F81 with Iridescent Coating	100	2000

## LRC®

### ONE-PIECE ATTENUATOR PADS

Thomas & Betts one-piece LRC® in-line Attenuator Pads are designed for applications including RF attenuation for Set Top Boxes and VoIP/Cable Modems. These attenuators reduce RF signal strength, which in turn reduces RF signal overload and intermodulation caused by high input levels.

#### PHYSICAL PROPERTIES

- Body Components: Brass
- Body Finish: Iridescent Chromate over Cadmium
- Seizing Pin: Phosphorus Bronze with Silver Plating
- Pin Finish: Beryllium Copper with Silver Plating

#### ELECTRICAL PROPERTIES

- Attenuation:
  - AP1FM - 1 dB +/- .5 dB
  - AP3FM - 3 dB +/- .5 dB

## LRC®

### TWO-PIECE ATTENUATOR PADS

Thomas & Betts two-piece LRC® in-line Attenuator Pads are designed for applications including RF attenuation for Set Top Boxes and VoIP/Cable Modems. These attenuators reduce RF signal overload and intermodulation caused by high input levels.

- Attenuation flatness within  $\pm 0.5$  dB from 5 MHz to 1 GHz (20 dB Attenuation  $\pm 0.7$  dB)
- Nickel plated Brass Body and Tin Plated Beryllium Copper Seizing Contact (Seizing Contact retention 20 grams minimum)

#### PHYSICAL PROPERTIES

- Body Components: Brass
- Body Finish: Nickel
- Seizing Pin: Beryllium Copper
- Pin Finish: Tin

#### ELECTRICAL PROPERTIES

- Attenuation:  
FMAP3 - 3 dB  $\pm .5$  dB  
FMAP6 - 6 dB  $\pm .5$  dB  
FMAP8 - 8 dB  $\pm .5$  dB  
FMAP10 - 10 dB  $\pm .5$  dB  
FMAP20 - 20 dB  $\pm .7$  dB

#### MECHANICAL PROPERTIES

- Retention Force of Female Contact: 20 grams minimum

CSTMV596

CST596711

CST596711MV

CST596596MV

- Consistent one-step cable preparation
- Compatible with all Snap-N-Seal® connectors
- Color-coded replacement blades available
- Built-in storage area for the unused blade module
- High strength polymer tool body
- Ergonomically designed to fit the hand
- Finger loop for easy cable preparation

## STUBBY™ CABLE PREPARATION TOOL

The innovative new “Stubby” cable preparation tool from Thomas & Betts is designed to allow you to prepare cable in tight spaces where other tools will not fit.

- Facilitates proper cable preparation in confined areas where conventional strip tools don't work
- Eliminates need to run new cable when the short stub-in is just out of reach for the conventional strip tool
- rotates in a natural screw-driver type motion and will not nick the braid or score the center conductor
- Blade cartridges are easily interchangeable
- Standard 1/4" - 1/4" cable preparation
- Patent pending design

## **9150US Specifications**

### **Snap-N-Seal® Installation Tool**

The 9150US Installation Tool is designed to compress Snap-N-Seal® "F" Male Connectors.

## **9150US Design Advantages**

- A single compression tool installs Snap-N-Seal® 59, 6, 7, 11 and 320 series "F" Male connectors.
- Narrow compression head allows easy access for connector compression in space-limited applications.
- A moveable yoke allows the installer to easily change compression lengths from 59 and 6 "F" Male, to 7, 11 and 320 series "F" Male connectors.
- Ergonomic design comfortably fits the hand to minimize user fatigue and promote productivity.
