Keep Your Food, Drinks And Snacks Fresh For Longer.

Keeping food and drink fresh and safe to consume is high priority for travellers across the globe. Ventura Chillbox CB4500 Thermoelectric Cool Box is ideal for camping, caravanning, motorhomes, and Truck use.

With a high performance thermoelectric heat pump, Ventura ChillBox CB4500 will keep food and drinks cool or warm, depending on your preference.

Easy To Transport And Lightweight.

With a capacity of 45 Litres, Ventura Chillbox is lightweight at only 9.5kg and comes complete with an integrated handle for simple and easy transportation.

Used as a chest style cooler or an upright fridge, Ventura Chillbox CB4500 features a hinged lid for easy access and quick closing, helping to avoid warm air hitting the contents whilst out camping. It's the ideal accessory for any dedicated camper.

Capacity 45 Litres.

As one of the largest capacity coolers on the market today, Ventura Chillbox CB4500 is ideal for any family keen on camping and wanting to enjoy the self catering lifestyle. Perfect picnics everytime.

Low Cooling Temperature.

Ventura Chillbox cools down contents to 23° below ambient temperature, making it one of the best coolers around. Keep food and drinks fresh for longer.

Alternative Warming Option.

As well as cooling the contents of the Chillbox, users can additionally keep pre-heated food warm up to 65°C, perfect for those autumn evenings or even keeping your takeaway warm on the way back to the campsite.

Easy Transportation.

With an integrated handle, rear wheels and recessed side handles, Ventura ChillBox CB4500 is easy to transport from vehicle to camp pitch.

Thermoelectric Cooler.

Ventura ChillBox CB4500 45L coolbox is a thermoelectric cooler, that uses a high performance, Peltier solid state heat pump and is extremely reliable. A solid state heat pump transfers current (cool or warm) from one side of the ChillBox to the other, creating a cooling or warming state.

Hinge Lid.

For ease of use and to protect contents, CB4500 comes with a hinge lid allowing users to quickly access contents when required.

Triple Power Source.

Ventura ChillBox can be powered up via AC and DC power sources. Mains Power 220-240V or DC charge 12 or 24V provide convenient ways to power your Chillbox.
