## 1. Safety precautions

### CAUTION:

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to "dangerous voltage" and to prevent from a risk of electric shock.

**Warning:**  
To reduce the risk of electric shock, don't open the cabinet. Refer servicing to qualified personnel only.

The exclamation point within an equilateral triangle is intended to alert the user to important operating and maintenance (servicing).

**WARNING:** Do not use this STB where contact with or immersion in water is a possibility. Do not use near flower vase, washbowls, kitchen sinks, laundry tubs, swimming pools, etc.

**WARNING:** Do not put the candle or lamp stand on the cabinet; otherwise, there is the danger of fire.

**WARNING:** The unit should be connected to a power supply only of the type described in the operating instructions or as marked on the unit. If you are not sure of the type of power supply (for example, 100 or 240 V) to your home, consult your local dealer or local power company.

**WARNING:** This product install diodes. Do not open the cabinet or touch any parts in the inner mechanism. Consult your local dealer for technical service if the opening is required.

**Note:** To ensure proper use of this product, please read this User manual carefully and retain for further reference.

**Note:** This product install diodes. Do not open the cabinet to avoid the unit direct exposure to radiation.

**Unit Cleaning:** After the unit power is turned off, you can clean the cabinet, panel and remote control with a soft cloth lightly moistened with a mild detergent solution.

**Attachments:** Never add any attachments and/or equipment without the manufacturer consent; as such additions may result in the risk of fire, electric shock, or other personal injury.

**Locating:** Slots and openings in the cabinet are provided for ventilation to protect it from overheating. Do not block these openings or allow them to be blocked by placing the STB on a bed, sofa, or other similar surface, nor should it be placed over a radiator or heat register.

**Power-Cord Protection:** Place the power-supply cord out of the way, where it will not be walked on. Please take special attentions to cords at plugs, convenience receptacles, and the point where they exit from the unit.

# Basic Operation

**Object and Liquid Entry:** Never put objects of any kind into this STB through openings, as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill any liquid on the STB.

**Note:** Moisture may be formed on the lens in the following conditions:

- when the unit is suddenly moved from a cold environment or an air-condition room to a warm place.
- immediately after a heater has been turned on.
- In a steamy or very humid room.

If the moisture forms inside the unit, it may not operate properly. To correct this problem, turn on the power and wait about two hours for the moisture to evaporate.

**Parts Replacement:** When the unit parts need to be replaced, user should make sure the service technician use the replacement parts specified by the manufacturer or having the same characteristics as the original part. Unauthorized replacement may put the unit in the risk of fire, electric shock or other hazards.

**Safety Check:** After all the maintenances and repairs are done, user is required to request the service technician to conduct the overall safety check to ensure the machine is in the proper condition.

## 2. FEATURES

- MPEG-Fully DVB-S / DVB-S2 HD compliant
- Endless channels (TV and Radio) programmable
- Multilingual menu text support
- Channel list editing
- Favourite channel list editing
- True-color On-Screen Display (OSD)
- Full Picture In Graphic (PIG) function
- Electronic Program Guide (EPG) for on screen channel information
- Subtitle supported
- Teletext supported by software emulation
- Parental lock facility by channel and program event
- Program and Channel information transfer from receiver to receiver
- DiSEqC 1.0, 1.1, 1.2 and USALS
- HDMI HD Video/Audio Output
- USB 2.0 Host
- LED Display for service information
- RTC (Real-Time-Clock)
- Time Shift
- Video Recording
- Recording one channel and Time Shifting another channel (optional)
- Conax Embedded Card Reader
- FullHD 1080p output via HDMI
- AVI, MKV, MPG, TS, WMA, WMV, M2TS, FLV, DAT, ASF, MP3 playback
- YouTube, SHOUTcast Radio, and Picasa Compatible

## ***Basic Operation***

---

- Weather forecast & Rss Reader Functions
- Software Upgrade support via USB, RS232 or Internet
- Endless possibilities with Plug-In support
- Message, FAQ and User Manual support
- Download files from FTP server
- Base on LINUX

## 3. Remote Control

You can power on/off the receiver, operate on screen menu, and use a variety of hot key function.

### **POWER**

To switch your receiver on from standby or standby to on.

### **MUTE**

Used to enable or disable the audio

### **NUMERIC KEYS**

Used to select channels or enter programming parameters

### **TV / RADIO**

Receiver switches between TV and Radio mode.

### **(ZOOM)**

Press **(ZOOM)** key select zoom times, from X1 to X16.

### **(RECALL)**

Return to the previous menu or status.

### **AUDIO**

Audio channels setup, to select audio mode; Left, Right, Stereo, Mono.

### **TV/SAT**

Receiver switches between TV and receive mode.

### **INFO**

To display channel status or various program information.

### **EPG**

Display the Programs guide on screen when available.

### **MENU**

Displays the Main Menu on the screen, or return to the previous menu or status.

### **EXIT**

Cancel the user selection and return to the viewing mode from a menu.

### **OK**

To select menu option, or to updated on entry.

### **◀, ▶ KEY**

To adjust volume level, or to move cursor left or right in the menu.

### **▼, ▲ KEY**

To change channels, or to move cursor up or down in the menu.

### **P+ / P-**

To move up the cursor to the next or previous page in the menu or channel list.

### **V+ / V-**

To adjust volume level.

### **PORTAL**

To display the navigation menu in Opera.

### **●RECORD**

To start the recording.

### **TXT**

Shows teletext or subtitle information of the current channel supports.

### **OPTION**

Shows NVOD information of the current channel supports.

### **Blue Button**

Into the multi-screen function in full screen.

### **(FIND)**

Use to prompt find channels sort by character.

### **(SLEEP)**

Press timer key you can setup up the Standby time.

### **V.FORMAT**

Press V.FORMAT button to switch the display mode among "Auto", "480", "576", "720", "1080i" and "1080P".

### **FAV(FAVORITE)**

To set receiver to the favorite server mode, display the favorite channel.

### **SAT**

Display the satellite list at normal picture.

### **FOLDER**

Press this button to enter the Record Manager menu directly.

### **Time Shift**

Press this button to display Time Shift info bar.

# Basic Operation

---

▶ **Play**

To play the MP3, JPEG, or Record files. And to display Time Shift info bar.

■ **Stop**

To stop the Time Shift, recording, or MP3/JPEG player.

|| **PAUSE**

Used to select the freeze function.

Press once to freeze the screen picture.

◀◀ / ▶▶ (**PAGE- / PAGE+**)

To start Fast Backward / Forward function.

◀ | / | ▶

Switch to previous / next file when play more files

•✖ **USB**

To remove the USB Hard Disk safely.

◀◀ / ▶▶ (**PREV / NEXT**)

Jump to beginning / end of the file in play mode

↺/▶ **PLAYMODE**

switch playing mode to order, single cycle and circulation list.

**F1**

To display quickbar menu in full screen.

**F2/F3**

Reserved buttons.

## 4. Front panel

**POWER KEY:** To switch the receiver power on/stand by

**MENU KEY:** Displays the Main Menu on the screen, or return to the previous menu or status.

**VOL-,VOL+ KEY:** To adjust volume level, or to move cursor left or right in the menu.

**CH-, CH+ KEY :** To change channels, or to move cursor up or down in the menu

**OK KEY:** To see TV/Radio channel list, or to confirm in the menu.

**Remote Sensor:** Detects infrared signal from remote control unit

**Display:** (LED type) Indicates operating status of receiver

**POWER Indicator:** while the receiver is power on and at standby mode.

**Card Slot:** One slot CA Interface for Conax, Insert the smart card chip side up!

## 5. Rear Panel

Please refer to the diagram above for all possible connections of your receiver

Do not connect the unit to the mains socket until all other connections have been made and checked.

Your configuration can vary depending on model

**LOOP:** This enables the connection of another receiver.

**LNB IN:** This port is to connect the coaxial cable from satellite antenna.

**HDMI:** Audio and Video output socket for TV set with HDMI Input Jack only.

**ETHERNET:** This is used to connect internet.

**IR IN:** This is used to connect a IR receiver to incept RCU.

**AV OUT:** This is used to connect to the TV or VCR using an RCA cable.

**RS 232:** This is used to connect your receiver to a computer through a serial cable.

**USB:** 2\*USB 2.0 Host, connect to USB hard disk, or flash disk

## 6. Connecting Your System

There are three ways to connect the receiver to your existing TV system. We recommend using one of the following cases for the best result:

## Basic Operation

1. If you have a high definition television set, you should use a HDMI cable for best result, Plug one end of the cable into the HDMI socket on the receiver, and the other end into the matching socket on your television. In this case, you do not have to make audio connections because the HDMI connector can output stereo audio or Dolby digital audio.
2. Connect one end of RCA cable to the RCA jack on the back of the receiver and the other end to a RCA jack on your TV.

Finally connect the coaxial cable from the operator to the CVBS jack on the receiver.

### **With External Audio / Hi-Fi System**

To connect any external Audio Hi-Fi system, the receiver has been provided with two RCA connectors at the back of the receiver marked with Audio L and R.

Connect an RCA stereo cable from the AUDIO L, R jacks on the back of the receiver to the LINE, AUX, SPARE OR EXTRA input jacks on your Hi-Fi System.

### **7.1 TV with Motorized System (DiSEqC 1.2)**

Connect one end of your coaxial cable to the LNB IN connector on the receiver and the other end to the REC or Receiver connector on the DiSEqC 1.2 motor.

Connect the coaxial cable from the LNB to the LNB connector on the DiSEqC 1.2 motor.

All our receivers are designed to be DiSEqC 1.0 and DiSEqC 1.2 compatible.

This allows multiple antennas to be connected to the receiver at the same time.

If you have two or more fixed antennas or LNBS, then we recommend you use a DiSEqC 1.0 switch.

Connect the coaxial cable from the first LNB to the LNB 1 or LNB A input connector of the DiSEqC switch.

Do the same for any other LNBS that you have.

Connect the other end to the LNB IN socket on the receiver.

To the digital receiver, you can connect either a single satellite antenna directly or LNB of multi-feed equipment.

## 7. Basic operations

### Turn on STB

First, press the [POWER] to turn on the unit. When the STB is first used, there will play the first channel from the default Channel List. If the STB is not first used, STB will play the same channel as last time before turning off.

### ? Frequently Asked Question

**Q: The power of my STB has been turned on and not in Standby mode, but the TV screen showed nothing:**

A: Make sure the TV set has been set to the correct video input (not the TV channels). For example, if you have connected the unit with the Video1 input of the TV set, the TV set has to be switched to Video1.

**Q: The power of my STB has been turn on and not in Standby mode, but the TV screen showed nothing except popup window with “No Signal” information.**

A: That means the channel, which you select, is no signal. Check connection of signal cable or contact operator.

### Power

1. Press [POWER] Key can enter the Standby state
2. In Standby state, press [POWER] Key again can call back the unit and go on play the previous channel
3. User can also disconnect the device's main power to end the Standby state.

### Channel Up/Channel Down

In full screen, press [UP/DOWN] to change channel.

### Volume Up/Volume Down

In full screen, press [LEFT/RIGHT] or [VOL+/VOL-] to adjust volume.

### Number

In full screen, use number key and press [OK] on the Remote Control Unit to change channel.

### Mute

1. Press [MUTE] key to mute the sound and the screen will show up mute OSD.
2. Press [MUTE] key again to restore sound.

### Pause

1. In playing mode, press [PAUSE] key, the picture will be paused, but the sound of the channel will still continues.
2. Press [PLAY] key, the screen's picture will skip over to the current playing picture, and the sound of the channel will corresponding playing.

### Recall

Press [RECALL] key will directly switch to the previous channel that you played before current channel.

### Favourite

1. In full screen, press [FAV(FAVORITE)] key, it will display a window of “Favorite Group” on the left of the screen, which you can watch like below:
