

Clarke CHT760 20 Piece Drill And Driver Set –

If you want precision drilling/driving in a wide range of material including wood, steel, aluminium and more, this 20 piece drill and driver bit set is ideal. Manufactured to the highest quality, the drill bits in the set are Titanium coated for durability and high performance.

These bits operate at cooler temperatures than standard HSS bits which means they can be used for prolonged periods without risk of damage. The Titanium coating also extends the lifespan of the bits, meaning they won't need to be replaced as quickly or as often as traditional HSS bits, saving you money and effort. Complete with drill and screwdriver bits of various sizes to suit a large range of applications.

- A useful 20 piece drill and driver set containing:
- 1/4in (6.35mm) quick change chuck
- 8 hex shank drill bits (2x 1.5mm, 2 x 2.5mm, 3mm, 4mm, 5mm & 6mm)
- 8 x 50mm long screwdriver bits (Slotted: 5mm & 6mm, Philips: #1, 2x #2 & #3, Torx T15 and Square #2)
- 3 x hex shank nut drivers (5, 6 and 8mm)
- Tough plastic storage case
