

# NightWatcher

## ROBOTIC SECURITY LIGHTING

### NW720 Robotic LED Security Light with 720p Camera & SD Recorder

The security light that locks on and tracks intruders.

Detection Zone

## Overview

The NightWatcher Security Light is a proven and effective method of deterring intruders from entering your home or business. The NightWatcher is a patent pending motion tracking feature, built into a PIR lamp.

The NightWatcher NW720 detects motion within the 220° field of vision of the PIR and turns the lamp and camera to point directly at the intruder. As the intruder moves across the viewing range, the motorised NightWatcher lamp head takes aim, records 720p video or high resolution still images, providing valuable photographic evidence in the event of burglary or theft.

## Features

- 3X passive infrared sensors with a total detection zone of 220°
- Built-in 720p camera records video or images to built-in SD recorder
- Powerful yet energy saving AC LED designed to deliver a bright 1000 lumens output
- Robotic head rotates left and right with total movement of 210°
- Supplied with 2GB SD card (maximum storage capacity 64GB)
- IP55 Rated
- Available in black or white

## Specifications

Detection Method	Passive Infrared Sensor (with continuous detect function)
Material	Cast metal/plastic
Power Supply	AC240V 50Hz
Light Rotation Angle	210°
PIR Detection Area	10m x 220° (maximum)
Light-up Time	3 Minutes (return to centre)
Waterproof Rating	IP55
