GENERAL SPECIFICATIONS

- Interface: USB 2.0
- Cable length: 1.2M
- Buttons: 3
- Dimensions: 52 x 33 x 93mm (W x H x D)

SYSTEM COMPATIBILITY

- Windows 2000 & above
- Mac compatible

TECHNICAL SPECIFICATIONS

- Button life: 3 million cycles (MTBF)
- Scroll wheel life: 100,000 cycles (MTBF)
- Sensor report rate: 3500 frames/sec
- Sensor light: Red LED
- Operating temp: 0°C ~ 40°C
- Operating humidity: 20% ~ 90% RH

PACKAGING DETAILS

- Product box dimensions: 77 x 164 x 40mm (W x H x D)
- Primary packaging material: Cardboard
- Primary packaging weight: TBA
- Secondary packaging material: Plastic
- Secondary packaging weight: TBA
- Product and packaging weight: TBA
- Box qty: TBA
- Carton size: TBA
- Total carton weight: TBA
- Country of origin: China

ANTI BACTERIAL Coating

The anti-bacterial coating inhibits the growth of bacteria helping to prevent the spread of germs, bugs & flu viruses.

Ideal for general office or home use or in environments where hygiene is paramount such as hospitals, dental practices, doctor's surgeries, vets, laboratories and in food & pharmaceutical production areas.

Reasons to choose an Anti-bacterial product: The common cold can be caused from more than 200 different types of viruses. Due to continuing mutations the body cannot build up resistance against such a diverse set of constantly changing viruses. The common cold can be spread by coming into contact with infected people or contaminated surfaces. The cold virus can live on objects such as telephones, PC keyboards, and door handles for several hours. The common cold can be contracted by touching one of these objects harbouring a cold virus. Professionals and office workers can spend at least 6 hours per day working with PC's and other office equipment. In many cases, PC's, mice, telephones etc. are shared. The more people using them, the more viruses & bacteria they collect. Resulting in a high probability that a cold or flu will be passed on by a sick co-worker.
