

Master and Command C for PIC[®] MCU

SKU: 52903-1129

Exploring Advanced Features of the CCS C Compiler, Volume 1 by Fred Eady

Master and Command C for PIC[®] MCU gives readers the opportunity to look over Fred's shoulder as he explores some of the CCS compiler's more advanced built-in functions. Beginners to advanced CCS compiler-users alike will likely learn several new tips and tricks to improve their coding style. Tips and tricks include everything from writing some ever-useful #define macros to using conditional compilation techniques to conserve memory. Readers will also learn to use the power of the compiler to debug programs

instead of adding hardware to their board. More compiler features are yet to be uncovered by Fred Eady, stay tuned for Volume 2.
