

# M2.5 × 16mm Cheese Head Machine Screw Zinc Plated, Pack of 100

**Dimensions:**

Raised cheese head screw, threaded up to the head  
(above the stepped line in the table)

Raised cheese head screw, with unthreaded  
portion of shank\*  
(below the stepped line in the table)

Other dimensions and details as in left-hand illustration.

The shank diameter may be equal to the thread diameter (major diameter) (normal shank) or approximately equal to the pitch diameter (reduced shank)

**Cross recess type H**

**Cross recess type Z**

If raised cheese head screws are to be supplied with length as given below the stepped line and threaded up to the head, i.e. deviating from the standard design, then symbol A is to be incorporated in the designation in accordance with the product or the deviating thread length is to be included in the designation, again in accordance with the product.  
(the tolerance on the thread length being normally  $^{+2}_0 P$ )

60	59	61	-

The screws are, as a general rule, manufactured in the sizes for which the mass has been given (for guidance only)

Bracketed sizes should be avoided as far as possible.

Lengths exceeding 60mm shall be graded in steps of 10mm

<sup>1</sup>)P = Pitch of thread.
