

Long Life Micro Tip (#7484)

Long Life Micro Tip (#7484)

Diameter is 1/64" or .016".

Note: Long Life tips are recommended for those who solder numerous connections. Heat-up time is approximately 20% longer than our standard tips.

Long Life tips are iron-nickel-chrome plated to withstand long periods of soldering time. These processes provide maximum life for extended usages.

- Copper shell is iron plated to resist erosion
- Nickel and chromium plated to resist corrosion
- Tinned to provide efficient heat transfer
