## Superior stereo acoustics with Bluetooth(tm) wireless freedom

Using a tablet,  
smartphone or computer  
for your digital audio or  
voice communications?  
Disappointed with your  
current sound  
reproduction or messy  
phono cables?

The new Dynamode **DH-101LTX** series of Bluetooth(tm) compatible headphones are your ideal choice for a dynamic and natural audio playback with punchy bass and lively treble. Using high-performance speaker drivers which offer a wider dynamic range and enables subtle sounds in movies and music to be faithfully reproduced.

Incorporating a full-size LCD display allows the user to quickly and with minimal fuss to adjust volume, skip tracks, tune into the built-in radio and of course pair the headphones for Bluetooth(tm) connection. Battery life too is displayed and a full charge will give the user around 12 hours approx.

It works with your phone too. Simply press the on-board 'answer' button and you can have a two-way conversation courtesy of its built-in mic. The **DH-101LTX** can also be used with non Bluetooth(tm) devices via its standard 3.5mm phono jack, with phono cable and USB charge lead supplied as standard.
