pro-POWER

RoHS  
Compliant

## Application:

This solar cable is intended for the interconnection within photovoltaic systems such as solar panel arrays. Suitable for fixed installations, internal and external, within conduit or systems, but not direct burial applications. This solar cable is ozone-resistant according to BS EN 50396, UV resistant according to HD 605/A1, and is tested for durability according to EN 60216. The cable is designed to last at least 25 years. Being flame protected with a halogen free fire retardant system with low smoke properties these cables are designed for safety in case of fire.
