Radio interference suppression filter, single phase

HLE 110-230/30

Advantages

For enhanced requirements

Single-stage filter concept

Efficient filter effect against line-bound interference emissions

Increase in the interference immunity of the connected consumer

Applications

Radio interference suppression filter for line-side interference suppression of single devices, frequency converters or as group interference suppression.

Standards

Radio interference suppression filter to DIN EN 60939-2

Approvals

Radio interference suppression filter, single phase **HLE 110-230/30**
