

01st April 2014

Dear Sirs

Re: Paguro series 5625

With reference to the image and table below please be advised that the Paguro series 5625 has changed colour from orange to black.. The change is an enhancement of the body material specification which now includes UV resistance along with the existing properties of the Nylon 66 material.

Please note that this change is a material enhancement and colour change only and the new products will be fit/form/function compatible with the existing items. However, the part number will also change as below:-

Current Hylec stock reference	Description	New Hylec stock reference
5625/////1121	3 POLE IP68 GEL CONNECTOR KIT – ORANGE	
	3 POLE IP68 GEL CONNECTOR KIT - BLACK	5625/////1121

Yours faithfully

Mark Severn
Director of Sales
