# P410 Series Metallized Impregnated Paper Class X1, 300 VAC

#### **Overview**

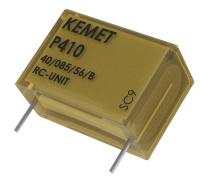

The P410 Series is constructed of multilayer metallized paper encapsulated and impregnated in self-extinguishing material meeting the requirements of UL 94 V–0.

## Applications

Typical applications include worldwide use in contact protection, contact interference suppression and transient suppression.

#### **Benefits**

- Approvals: ENEC, UL, cUL
- Rated voltage: 300 VAC 50/60 Hz
- Capacitance range: 0.022 0.1 µF
- Capacitance tolerance: ± 20%
- Resistance range: 100 Ω
- Resistance tolerance: ± 30%
- Lead spacing: 15.2 25.4 mm
- Climatic category: 40/085/56/B, IEC 60068-1
- Tape and reel packaging in accordance with IEC 60286-2
- · RoHS Compliant and lead-free terminations
- Operating temperature range of -40°C to +85°C
- Excellent self-healing properties which ensure long life even when subjected to frequent over-voltages
- · Good resistance to ionization due to impregnated paper dielectric
- High dV/dt capability
- Impregnated paper ensures excellent stability and reliability properties, particularly in applications with continuous operation

## Part Number System

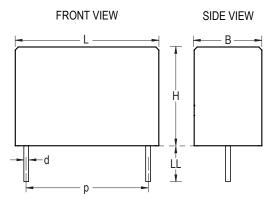

Р	410	Q	М	223	М	300	Α	H101
Capacitor Class	Series	Lead Spacing (mm)	Size Code	Capacitance Code (pF)	Capacitance Tolerance	Rated Voltage (VAC)	Lead and Packaging Code	Resistance ( $\Omega$ )
P= Metallized Paper	RC Snubber	Q = 15.2 C = 20.3 E = 25.4	See Dimension Table	First two digits represent significant figures. Third digit specifies number of zeros.	M = ±20%	300 = 300	See Ordering Options Table	H + first two digits representing significant figures. Third digit specifies number of zeros.

## **Ordering Options Table**

Lead Spacing Nominal (mm)	Type of Leads and Packaging	Lead Length (mm)	Part Number (Insert at 14th character)
	Standard Lead and Packaging Options		
	Bulk – Short Leads	6 +0/-1	С
15.2	Bulk – Maximum Length Leads	30 +5/-0	A
13.2	Tape & Reel (Standard Reel)	H <sub>0</sub> = 18.5 +/-0.5	L
	Other Lead and Packaging Options		
	Tape & Reel (Large Reel)	H <sub>0</sub> = 18.5 +/-0.5	Р
	Standard Lead and Packaging Options		
	Tray – Short Leads	6 +0/-1	С
20.3	Bulk – Maximum Length Leads	30 +5/-0	A
20.5	Tape & Reel (Standard Reel)	H <sub>0</sub> = 18.5 +/-0.5	L
	Other Lead and Packaging Options		
	Tape & Reel (Large Reel)	H <sub>0</sub> = 18.5 +/-0.5	Р
	Standard Lead and Packaging Options		
25.4	Bulk – Short Leads	6 +0/-1	С
	Bulk – Maximum Length Leads	30 +5/-0	A

## **Soldering Process**

The implementation of the RoHS Directive has required the use of SnAgCu (SAC) or SnCu alloys as primary solder. These alloys require a higher liquidus temperature ( $217^{\circ}$ C –  $221^{\circ}$ C) as compared to SnPb eutectic alloy (183°C). Due to the higher pre-heat and wave temperatures, the heat stress to components has increased considerably. Polypropylene capacitors are especially sensitive to soldering temperature due to the relatively low melting point of polypropylene material ( $160^{\circ}$ C –  $170^{\circ}$ C). As a result, wave soldering can be destructive, especially to mechanically small polypropylene capacitors with lead spacings of 5 –10 mm. For more information, please refer to KEMET's Recommended Soldering Profiles or contact a KEMET representative. IEC Publication 61760–1 Edition 2 may also be consulted for general guidelines.

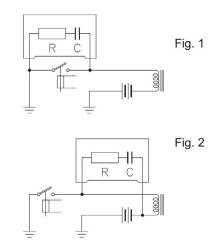

## Construction

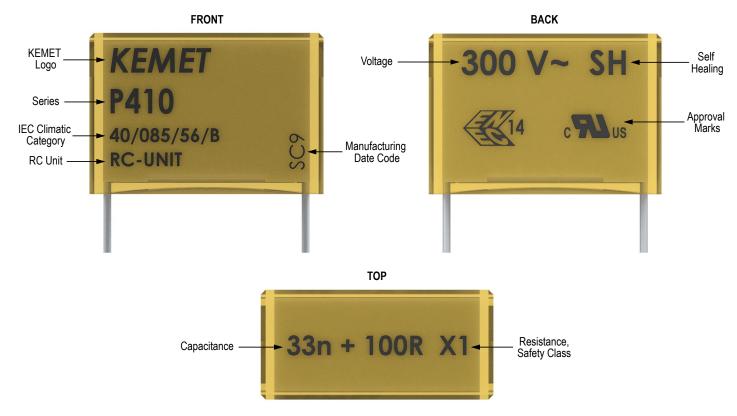

## Mounting

RC units are mounted in parallel with the contacts to be protected or in parallel with the inductive load (Fig. 1 and Fig. 2). RC units are generally mounted in parallel with the contacts to suppress radio interferences (Fig. 1).

## Marking

## **Packaging Quantities**

## Lead Taping & Packaging (IEC 60286-2)

#### Lead Spacing 10.2 – 15.2 mm

Lead Spacing 20.3 – 22.5 mm

#### Formed Leads from 10.2 to 7.5 mm

## **Taping Specification**

	Dimensions in mm										
Lead spacing	+6/-0.1	F	Formed 7.5	10.2	15.2	20.3	22.5	F			
Carrier tape width	+/-0.5	W	18	18	18	18	18	18+1/-0.5			
Hold-down tape width	+/-0.3	W <sub>0</sub>	9	12	12	12	12				
Position of sprocket hole	+/-0.5	W <sub>1</sub>	9	9	9	9	9	<b>9</b> +0.75/-0.5			
Distance between tapes	Maximum	W <sub>2</sub>	3	3	3	3	3	3			
Sprocket hole diameter	+/-0.2	D	4	4	4	4	4	4			
Feed hole lead spacing	+/-0.3	P <sub>0</sub> <sup>(1)</sup>	12.7(4)	12.7	12.7	12.7	12.7	12.7			
Distance lead – feed hole	+/-0.7	P <sub>1</sub>	3.75	7.6	5.1	8.9	5.3	P <sup>1</sup>			
Deviation tape – plane	Maximum	Δp	1.3	1.3	1.3	1.3	1.3	1.3			
Lateral deviation	Maximum	$\Delta h$	2	2	2	2	2	2			
Total thickness	+/-0.2	t	0.7	0.7	0.7	0.7	0.9 <sup>max</sup>	0.9 <sup>max</sup>			
Sprocket hole/cap body	Nominal	H <sub>0</sub> <sup>(2)</sup>	18+2/-0	18+2/-0	18+2/-0	18+2/-0	18.5+/-0.5	18+2/-0			
Sprocket hole/top of cap body	Maximum	H <sub>1</sub> <sup>(3)</sup>	35	35	35	35	58	58 <sup>max</sup>			

(1) Maximum cumulative feed hole error, 1 mm per 20 parts.(2) 16.5 mm available on request.

(3) Depending on case size.(4) 15 mm available on request.

#### Disclaimer

All product specifications, statements, information and data (collectively, the "Information") in this datasheet are subject to change. The customer is responsible for checking and verifying the extent to which the Information contained in this publication is applicable to an order at the time the order is placed.

All Information given herein is believed to be accurate and reliable, but it is presented without guarantee, warranty, or responsibility of any kind, expressed or implied.

Statements of suitability for certain applications are based on KEMET Electronics Corporation's ("KEMET") knowledge of typical operating conditions for such applications, but are not intended to constitute – and KEMET specifically disclaims – any warranty concerning suitability for a specific customer application or use. The Information is intended for use only by customers who have the requisite experience and capability to determine the correct products for their application. Any technical advice inferred from this Information or otherwise provided by KEMET with reference to the use of KEMET's products is given gratis, and KEMET assumes no obligation or liability for the advice given or results obtained.

Although KEMET designs and manufactures its products to the most stringent quality and safety standards, given the current state of the art, isolated component failures may still occur. Accordingly, customer applications which require a high degree of reliability or safety should employ suitable designs or other safeguards (such as installation of protective circuitry or redundancies) in order to ensure that the failure of an electrical component does not result in a risk of personal injury or property damage.

Although all product-related warnings, cautions and notes must be observed, the customer should not assume that all safety measures are indicted or that other measures may not be required.
