Technical Liquids

• environmentally-friendly
• economical
• effective
Technical Liquids

Environmental protection, economic efficiency and health and safety at work - these are all requirements which every company has to fulfil to an increasing degree. That is why products and production systems that reach these requirements are becoming all the more important.

WEICON Technical Liquids achieve these requirements to a large degree:
• they contain no flammable propellants
• no extensive or costly disposal is necessary
• emissions are reduced
• less packaging refuse
• only the substance itself is processed

Cleaner S

Cleaner S removes oily and greasy soiling from all metals, ceramics, glass and most plastics. It may, however, attack the surface of thermoplastics such as PVC, plexiglas, polystyrene, and simple paint coats. WEICON Cleaner S evaporates quickly and, unlike conventional thinners, without leaving residues.

Areas of application
• as pre-treatment before priming and coating/painting
• for cleaning of machine parts and tools
• as pre-treatment before use of other products, when a greasy surface would affect performance

Mould Cleaner

Highly active substances (organic solvents) serve to clean the surfaces of plastic, steel and aluminium moulds from remaining layers of resin, release agent residues and other substances.

Even oils, silicones and PUR residues (in non-cured condition) can be removed efficiently.
Workshop Cleaner

Workshop Cleaner cleans and degreases all metals, plastics, types of rubber, glass, ceramics and wood. It removes grease, oil, resin, rust, wax, nicotine, insect dirt, bitumen and tar specks.

Workshop Cleaner is free of solvent, emulsifier and phosphate as well as oil removal accommodating (ÖNORM B 5105) and, in accordance with EC-guidelines, bio-degradable. By designated use the requirements of the German Food and Consumer Goods Laws are fulfilled. It is highly concentrated and can be watered down to the proportion 1:40 (max.).

Areas of application
- machines and all kinds of tools
- work shop facilities e.g. work benches, shelves, sliding doors, industrial flooring
- motor vehicles, e.g. forklift trucks, pallet trucks, lorries, indoor transporters
- motor parts, e.g. oil sumps, valve covers, starters, generators

Workshop Cleaner contains selected foamless tensides and, in addition to manual cleaning, can be used in high-pressure cleaners, part washing machines and spray apparatuses (e.g. Pump Dispenser WPS 1500). Special ingredients provide temporary corrosion protection.

Parts and Assembly Cleaner

Especially developed cleaner for coarse, oily and greasy soiling. Because of the long working time, also suitable for cleaning bigger or heavily resinified surfaces.

Due to the high flash point (> +60°C (+140°F) of the active substance), this cleaner corresponds to the former German Vbf-classification AIII and complies with the co-operative recommendations for the safety at work. This is an advantage compared to traditional AI or All cleaners.

Areas of application
- Cleans quickly and efficiently all kinds of assembly parts, aggregates, construction parts and tools
- Removes oils, greases and other soiling from all metal parts
- In the automotive sector: Cleans brakes, clutches, motor parts, etc.

Parts and Assembly Cleaner is free of acetone, butanol, ethyl acetate, etc.
Brake Cleaner

Brake Cleaner is a multi-purpose cleaner especially for the automotive sector. Unlike conventional thinners, WEICON Brake Cleaner evaporates quickly without leaving residues. It quickly cleans and degreases metals, glass, ceramics and many plastics.

Areas of application
Removes oily and greasy layers and residues
• on brakes (drum and disk brakes, linings, brake pads, cylinders, springs and bushes)
• on clutches (clutch linings and components)
• on engine components (carburettors, fuel and oil pumps, transmissions etc.)

* Before use, check surface compatibility.

Plastic Cleaner

Plastic Cleaner is the ideal product for the cleaning and degreasing of sensitive surfaces.*

Due to the use of aggressive cleaners, many plastics, for example, are attacked in such a way that their surface structure is changed. Stress cracks, brittleness, and/or matt surfaces are the result.

A further use of these materials is often not possible for optical or technical reasons.

Areas of application
• Cleaning and degreasing of:
  - Sensitive plastics like thermoplasts (PVC, PMMA = plexiglass, polystyrene, etc.), e.g. window frames, roller blinds, plastic profiles
  - Rubber materials such as seals
  - Lacquered surfaces, such as powder-coated metal parts
• Removal of the rest of labels and stickers

* Before use, check surface compatibility.
Surface Cleaner

Is used for cleaning and degreasing surfaces to be joined or sealed with WEICON adhesives and sealants. WEICON Surface Cleaner can be applied on materials like metal, glass, ceramic and most plastics*. Only grease-free and clean surfaces guarantee both good adhesion and reliable curing of the adhesive.

Areas of application
- Cleaning and degreasing of surfaces as preparation before bonding with WEICON adhesives
- Cleaning and degreasing of machine parts during service works
* Check surface compatibility prior to use.

AT-44 Allround-Fluid with PTFE

WEICON AT-44 Allround Fluid with PTFE is used in all sectors of industry and workshops. By its special formula (extremely low friction coefficient due to a high content of PTFE) the product combines effectiveness in:

- corrosion prevention
- cleaning
- water displacement
- lubrication
- preservation

Areas of application
- loosens seized threads, bolts, fittings and valves
- displaces moisture from electrical leads
- prevents leak currents and facilitates starting of damp engines
- eliminates squeaky and creaky noises on hinges, guides, bearings and all kinds of joints and couplings
- cleans contaminated surfaces and leaves a very thin film which does not smear, is not sticky and repels dust
- protects and preserves tools, machines, electrical and mechanical precision equipment (measuring tools, locks and weapons) and keeps them operational

WEICON AT-44 is strong, silicone-free and resists all atmospheric influences. Therefore, it is suitable for almost unlimited applications in workshops, the automotive industry, the marine and electrical industry, agriculture, households and for hobbies.

Sealant and Adhesive Remover

Removes residues of hardened sealants and adhesives as well as lacquers and paints. Can be used on metal, wood, glass, ceramics, polyethylene and polypropylene - also on vertical surfaces. It should not be used on less resistant plastics, such as PVC, synthetics, linoleum etc.

Areas of application
- Almost all kinds of sealant residues, e.g. on cylinder heads, oil sumps, water pumps, exhaust manifolds, valve covers and gearbox flanges
- Oil carbon deposits, paints, lacquers, oils, resins, greases, tar; lubricating and sliding agents
- Adhesives, e.g. even cured cyanoacrylate and anaerobic adhesives

Areas of application
- loosens seized threads, bolts, fittings and valves
- displaces moisture from electrical leads
- prevents leak currents and facilitates starting of damp engines
- eliminates squeaky and creaky noises on hinges, guides, bearings and all kinds of joints and couplings
- cleans contaminated surfaces and leaves a very thin film which does not smear, is not sticky and repels dust
- protects and preserves tools, machines, electrical and mechanical precision equipment (measuring tools, locks and weapons) and keeps them operational

WEICON AT-44 is strong, silicone-free and resists all atmospheric influences. Therefore, it is suitable for almost unlimited applications in workshops, the automotive industry, the marine and electrical industry, agriculture, households and for hobbies.
W 44 T Turbo-Power-Fluid

W 44 T Turbo-Power Fluid is a product for all servicing and maintenance works. By its special formula and excellent penetrating properties the product combines effectiveness in corrosion prevention, cleaning, water displacement, lubrication and preservation. W 44 T offers good resistance against atmospheric influences.

Areas of application
• loosens seized threads, screws, bolts, fittings and valves
• displaces moisture from electrical leads, prevents leak currents and facilitates the starting of damp engines
• eliminates squeaky and creaky noises on hinges, guides, bearings and all kind of joints and couplings
• cleans contaminated metal surfaces and leaves a long lasting very thin film which does not smear, is not sticky and repels dust
• protects and preserves tools, machines, electrical appliances and mechanical precision equipment and keeps them operational

Bio-Cut

Bio-Cut is a cooling lubricant which is not water-miscible and is primarily used for the metal cut and non metal cut processing of low to highly alloyed steel, stainless steel, aluminium and nonferrous heavy metal.

This high-performance product is free of mineral oil and fully biodegradable. Bio-Cut protects machines and fixtures against corrosion for a long time.

Areas of application
• drilling, turning, tumbling
• milling, broaching, sawing
• punching, bending, pressing
• tapping of all steel qualities, cast iron, stainless steel, copper, brass, aluminium and their alloys

Active environmental protection as it does not contain chlorine, sulphur, barium, lead, cadmium, nitrite, PCB and formaldehyde.

Silicone

An ideal sliding and release agent for efficient production and maintenance. At the same time, it protects and preserves plastics, rubbers and metals.

Areas of application
• prevents the build-up of adhesive residues on presses and guides
• prevents products from sticking to conveyor belts, chutes and sideways
• protects electrical contacts from moisture
• preserves rubber, plastic and metal parts
• prevents embrittlement, freezing and sticking of rubber parts
• ensures smooth operation of car sunroofs, seat rails and safety belts

Silicone provides a long-lasting separating film and a good surface finish.
Bio-Fluid

Bio-Fluid is a resin, acid and solvent free, medical-grade, water-coloured lubricant, that has been specially developed for use in the food, beverage, pharmaceutical and cosmetic industries.

WEICON Bio-Fluid is odour-free, does not affect taste, is temperature resistant from -25°C (-13°F) to +120°C (+248°F), water-repellent and has excellent creeping properties. Hinders friction and wear and tear.

Areas of application
• lubrication and care of precision mechanisms of food technology
• as a lubricant in pharmaceutical production machinery
• on filling machines in the cosmetic industry
• slow moving drive chains and conveyer belts (e.g. in airports)
• as a lubricant in packing and filling equipment
• any parts where occasional technically unavoidable contact with food cannot be excluded

Metal-Fluid

New high-performance product for care, protection and cleaning of mat and glossy metal surfaces, such as stainless steel, aluminium, chrome and bright metals etc., indoors. Also available as a 500 ml pump dispenser.

Features
• preventative protection for new metal parts
• leaves a hand-dry and glossy protective film
• makes treated surfaces look new
• neutral odour
• antistatic effect and protection against new soiling
• temperature resistance from -10°C (+14°F) to +150°C (+302°F)

Metal-Fluid also cares, protects and cleans ceramic, wood, glass and plastics and is NSF-registered. Etched and printed inscriptions as well as plastic surfaces and rubber valves, e.g. in the kitchen area, will not be attacked.

Stainless Steel Care Fluid

Especially developed for cleaning, care and protection of mat and glossy stainless steel surfaces indoor and outdoor. Antistatic effect.

Areas of application
• removes and prevents finger marks
• removes grease films, e.g. from exhaust hoods and kitchen equipment
• cleans without stripe-marks also larger surfaces
• makes treated surfaces look new
• leaves a long-lasting water-repellent protective film
• prevents dirt from sticking to surfaces again

Non-food Compounds

Registration Programme
Mould Release Agent

Silicone-free sliding and release agent. Its special formulation of only pure natural products provides superior sliding properties and prevents adhesion to plastics, moulds, metals and tools.

Temperature resistance from -20°C (-4°F) up to +130°C (+266°F).

**Areas of application**

Various types of plastic processing including:
- injection moulding
- compression and vacuum moulding

Mould Release Agent is free of PCB, CFC and formaldehyde.

Label Remover

For fast and easy removal of paper labels and adhesive residues.

Stickers and labels can often only be removed with great difficulty. The dissolving power of conventional cleaning agents is often not sufficient, while mechanical removal may damage the surface, for example by scratching.

WEICON Label Remover removes labels and residues of acrylate- and caoutchouc based pressure-sensitive adhesives safely and without problems.

WEICON Label Remover is suited for many surfaces, such as glass, metal, wood, foils and plastics*.

* Before use, check surface compatibility.

Bio-Welding Protection

Prevents the build-up of weld spatter on gas nozzles and facility surfaces without affecting the quality of the welding seam. Free of chlorocarbons, other solvents and silicones.

Based on hazelnut and sunflower extract – biodegradable in line with EC-guidelines.

**Areas of application**

- prevents spatter adhesion to gas nozzles and surfaces adjacent to the weld
- provides full-surface protection during welding
- eliminates need for cleaning of welded parts with spatulas, brushes or chisels
- subsequent finishing processes such as bronzing, galvanization, anodizing or painting is possible without particular cleaning. Excess residues of the sprayed-on product merely has to be removed with e.g. WEICON Cleaner Spray S
Leak Detector

For fast, convenient and reliable location of even the smallest leaks (cracks or porous parts) in pressurized pipes or tanks. WEICON Leak Detector is non-flammable, non-corrosive, does not cause skin irritation and is DIN-DVGW-tested.

Areas of application
- loosens rusted or stiff parts, screws, bolts, joints and hinges
- displaces water from ignition systems
- ensures the function of mechanical parts and contacts, e.g. on distributor caps and spark plug connectors
- protects permanently against corrosion and oxidisation
- lubricates sliding surfaces
- cleans and services metal surfaces, mechanical parts and electrical equipment

Rust Loosener

Rust Loosener with its 6-fold function is an indispensable aid in all repair, maintenance and servicing jobs. Temperature resistant from -20°C (-4°F) to +150°C (+302°F).

Areas of application
- wherever compressed air, natural gas or liquid gas is processed
- wherever leakages can occur on fittings, threaded joints and connections
- on pneumatic brake lines and gas lines for increased safety

Leak Detection does not form hazardous compounds in contact with carbon dioxide (CO2), propane, butane, acetylene, oxygen, coal gas or natural gas. Temperature resistance is between 0°C (+32°F) and +50°C (+122°F).

Corro-Protection

Forms a dry, wax-like protective film which provides lasting protection of metal tools and precision parts for indoor storage and overseas shipment.

Areas of application
- as reliable corrosion prevention for bare metal parts
- for indoor storage of metallic materials
- as corrosion prevention for overseas shipment
- preservation of tools and precision parts

The protective film can be easily removed if necessary (e.g. using WEICON Cleaner S or Workshop Cleaner).

- Explosion limit: 80 bar
- Deformation pressure: 65 bar
- Material: Container and spray nozzle made of aluminium
Supplementary Products

**WSD 400**

Pressurized-Air Spray Can

WSD 400 is a refillable spray can from which most WEICON Technical Liquids can be applied. The can is fillable with compressed air via an adapter (accessories) from the compressed-air ductwork system (optimum working pressure 5-10 bar).

The use of WSD 400 offers many advantages, e.g.:
- environmentally friendly thanks to reusability
- economical due to the use of liquids in bulk
- only the pure fluid is sprayed
- safe due to the non-flammable propellant (compressed air)
- easy to handle, quickly refillable

The following accessories for WSD 400 are available:
- an adapter for filling from every compressed air system
- a valve set with four different valves and a ball pump with intake pipe

---

**WPS 1500 Pump-Dispenser**

WPS 1500 is a refillable pump dispenser in which many WEICON Technical Liquids can be used. The building-up pressure in the fluid container is achieved by pumping pure air with the pump rod. An integrated security valve opens automatically as soon as the allowed pressure (max. 4 bar) has been exceeded.

Activation of the spray button is enough to achieve steady, uniform fluid emission. By turning the nozzle screw the rate at which the spray is emitted and the sprayed amount can be smoothly regulated, from stream-like to cloudy-fine. The use of WPS 1500 offers many advantages, e.g.:
- environmentally friendly thanks to reusability
- economical due to the use of liquids in bulk
- only the pure fluid is sprayed
- safe due to the non-flammable propellant (compressed air)
- easy to handle, quickly refillable

The following accessories for WPS 1500 are available:
- 30 cm plastic extension with 0.8 mm diameter nozzle
- Sealing sets
Any product specifications and recommendations given therein must not be seen as guaranteed product characteristics. We do not warrant the continuously high quality of our products being free from defects. Only adequate laboratory and practical tests can prove if the product in question meets the requested properties are recommended. A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.

Technical Liquids
• environmentally-friendly
