2-Port Hub, Type 3 Unshielded

Need more workstations? No more MAU ports available? Use our 2-Port Hub!
LT7001A

Product Highlights

- Use inexpensive UTP cable.
- Connect two workstations to one lobe.
- No extra MAU port needed.

Further Details

- Hot-swappable. No downtime.
- Nonpowered.

Add two Token Ring workstations even if an extra MAU port is unavailable. This hub makes Token Ring expansion fast and easy!

Use a 2-Port Hub to double a single lobe's capacity, and you can add or remove workstations from the network without any downtime. This means you can operate your LAN without the extra MAU—or extra expense—of a backup ring.

Just use a patch cable to connect the 2-Port Hub's ring port to your existing Token Ring outlet. Then connect two workstations to Ports 1 and 2 of the hub. You don't even need to plug it into a power outlet because it's a passive, nonpowered device.

The 2-Port Hub supports Type 3 Token Ring and has unshielded RJ-45 connections for Type 3 unshielded twisted-pair cable, or shielded RJ-45 connections for Type 3 shielded twisted-pair cable.

Relay Tool Required	Yes
Speed	16 or 4 Mbps
Connectors	LT7001A: (3) Unshielded RJ-45; LT7002A: (3) Shielded RJ-45
Indicators	LEDs: (2) Port Status (1 per port)
Power	Nonpowered
Size	1.8"H x 6.5"W x 1"D (4.6 x 16.5 x 2.5 cm)

Weight

0.5 lb. (0.2 kg)

This product works with:

- CAT5 100-MHz Solid-Conductor Cable, 4-Pair, Straight-Pinned (EYN737MS)
