Soldering Iron General Purpose and Industrial

General Purpose Soldering Iron:

Description:

The iron features a small barrel to handle ratio, enabling users to manouver easily for better control when soldering. 100% impact resistant handle assuring well built, long lasting quality. Seamless stainless steel barrel restrains heat expansion, prorecting the internal heater, and ensuring a long life for the heating element. Supplied with a metal sheet stand.

Industrial Soldering Irons

Description:

The iron is designed for high power soldering jobs which require heat retention at the tip. Available in 100W and 200W, thess irons are useful mainly for soldering metal sheets, or as a branding tool. It can also be used to cut vinyl canopy fabric. The high quality heater element ensures a long life. It features an ON/OFF switch on the handle and is fitted with a Copper tip. Supplied with heavy duty sturdy stand.

Replacement tips:

Cross section of Long Life Tip

Features:

- · Long life tips are excellent heat conductive soldering tips made from pure copper.
- They are iron-plated making them multiple times more durable than regular copper tips.
- They are chrome-plated on the outside and therefore are corrosion free.
- · The tip is factory pre-tinned which improves the performance of the tip.
