

DM 525 25" Shear

A bench top shear with an 25" (610mm) cutting capacity suitable for cutting printed circuit board laminates, thin metal sheet and aluminium (1.5/2.0mm) or plastic labels/front panel materials. On lowering the operating handle, a spring loaded clamp is activated which holds the material securely during cutting, thus enabling cuts to be made with a minimum of effort.

These shears are composed of an epoxy powder coated cast aluminium frame fitted with hardened and ground steel blades. The shear has a clear acrylic front safety guard to protect the operator, whilst at the same time making it possible to see the blades so that the material to be cut can be aligned accurately. On the bed are both imperial and metric edge scales and fully adjustable front stop and back stop are supplied for batch work.

Shipping dimensions: 90cm x 50cm x 50cm 45KG
