

Product/Process Change Notice - PCN 09_0203 Rev. A

Analog Devices, Inc. Three Technology Way Norwood, Massachusetts 02062-9106

This notice is to inform you of a change that will be made to certain ADI products (see Material Report). Any issues with this PCN or requirements to qualify the change (additional data or samples) must be sent to ADI within 30 days of publication date. ADI contact information is listed below.

Note: Revised fields are indicated by a red field name. See Appendix B for revision history.

PCN Title: ADI Silicon Valley Second-Generation Complementary Bipolar CMOS Process (CBCMOS2) Fab Transfer

Publication Date: 22-Jan-2013

Effectivity Date: 22-Apr-2013 *(the earliest date that a customer could expect to receive changed material)*

Revision Description:

Add CMP402

Description Of Change

ADI has successfully qualified and transferred many CBCMOS2 products in ADI's Wilmington, Massachusetts facility. This revision is to transfer the CMP402 to ADI's Wilmington facility.

In conjunction with the transfer, polyimide will be added on top of the passivation.

Reason For Change

ADI is consolidating front-end manufacturing operations. Quality and reliability levels, electrical performance, and package dimensions are not affected by these changes. All transferred product will have comparable or improved manufacturing process capabilities.

The polyimide layer provides enhanced protection against package-induced stress and will facilitate further standardization of qualified material sets for plastic packages.

Impact of the change (positive or negative) on fit, form, function & reliability

There will be no changes to the parts fit, form, function and reliability.

Summary of Supporting Information

Qualification has been performed per ADI0012, Procedure for Qualification of New or Revised Processes. See attached Qualification Report Summary.
