Intelligent signaling unit
Harmony XVGU tower light with USB connection

Harmony XVGU tower light - easy to install and configure

With 256 signaling patterns that can be easily configured on location, the Harmony™ XVGU tower light adds flexibility and provides clear visibility into the status of your machines.

> Easy to install via USB cable to avoid complex wiring
> Configurable on location through Magelis™ advanced panels
> Flexible display options with multi-color signaling and flash options
> Added flexibility with 64 color combinations
> Variety of audible signals to choose from.

Schneider Electric

Innovative signaling made simple

The Harmony XVGU tower light consists of three configurable multi-colored LED layers and a buzzer unit. No PC is required – all configuration settings are done through Vijeo™ Designer on Magelis HMI advanced panels to simplify the process.

Vijeo Designer

Through the HMI device it is easy to configure your settings:

> Color combination:
Choose between red, orange, green, and blue

> Flash intervals:
Select between fast or slow intervals

> Buzzer tone:
Set it to sound at low, high, or a constant level, or to be inactive.

Simple installation

> Direct base or pole mount
> Pre-assembled USB cable for easy connection with the HMI unit
> No wiring is required between tower light and HMI
> Settings are done through the Vijeo Designer HMI configuration software.

Specifications

> Unique one-piece LED tower design, ø 60 mm
> Three configurable multi-colored LED layers
> Two-tone buzzer with three level volume control and four colors
> Variety of signal patterns (flashing / non-flashing lights)
> Power and signaling intelligently managed by the HMI
> Installation options, on direct base or pole mounting plate
> USB cable with clamp to prevent unintended removal.

Selection guide

XVGU 3SHAV	ø 60 mm intelligent USB tower light, 100mm pole mount with mounting plate
XVGU 3SWV	ø 60 mm intelligent USB tower light, direct mount with mounting plate
