High Speed Digital Interface Board Version 4.4

Description

The board allows the user to evaluate the latest ADC and DAC products quickly and easily. It connects to a host PC via a USB port, and is fully configured and controlled by the latest WaveVision software.

The complete WaveVision 4 System includes the following components:

- The WaveVision 4 Data Capture board
- WaveVision 4 User`s Guide
- Latest WaveVision software for the PC
- USB Cable
- In addition, an ADC or DAC product evaluation board is also required (sold separately)

The WaveVision 4 data capture system is able to provide performance analysis for TI`s range of general purpose and high speed ADCs and DACs up to a sample clock speed of 200 MSPS.
