SLIM WIRE-TO-BOARD CONNECTOR

Poke-in design

TE Connectivity (TE) introduces the Slim Wire to Board Connector that was developed for wire to PCB board connection. The slim connector with no housing serves as an easy poke in connector with strong retention ability. The advantage of using this connector is that the conductor can be connected quickly without special tools and the small profile saves the space on the PCB.

Product Offering

</table>

Mechanical Specifications

- Operating temperature range: -40 to 125°C
- Wire retention: 30 N Minimum
- Current rating: see table below

Electrical Specifications

- Voltage rating: 300 VAC Max.
- Dielectric strength: 2000 VAC

Materials

- Contact: Copper Alloy with Tin plating

Key Features

- Quick solderless poke in connector design
- Slim contacts that have no covering housing
- Several solutions for solid and stranded wire from 16 AWG to 24 AWG
- Safety standards with UL/CQC approval
- Available in Tape&Reel packaging

Applications

- LED Lighting Systems
- Home Automation
- Security Systems
- Telecommunications
