Introduction

This catalog has been designed to assist you, our customer, identify products to satisfy your connector needs for printed circuit board headers, mass termination connectors preloaded with contacts, crimp-snap contacts and housings, and card edge connectors with preloaded contacts.

The list at right identifies by centerline the types of product available and is meant to be of assistance to you in the product selection process.

Electronics

- Connectors terminate 26. 28 and 30 AWG discrete wire or .050 [1.27] centerline ribbon cable
- Color-coded housings
- Maximum cable insulation diameter of .039 [0.99] with **PVC** insulation only
- IDC contacts pre-loaded in receptacle housing
- 30 V. 1 A contact rating
- Contact design allows for gold-to-gold or tin-to-tin interface
- Contacts are lubricated to prevent fretting corrosion
- Wire feed-thru capability for daisy-chain wiring or closed end for point-to-point wiring
- Connectors are polarized for proper mating
- Manual and semiautomatic application tooling
- Mating heights shown below:

Component Recognized by Underwriters Laboratories Inc. to US and Canadian Standards, File No. E28476 CTUS (Connectors and Headers) File No. E53793 (Ribbon Cable)

These matrixes have been prepared to assist you in defining the correct mating halves for the MTA-50 header and connector kit combination. Where a "Y" is indicated the combination is a valid mating pair.

Note: Tyco Electronics does NOT recommend intermating connectors and headers with different contact platinas

.100 [2.54] Centerline MTA-100 IDC Connectors and Headers

Product Facts

₹ Тусо

 Connectors and headers for 2 through 28 positions; wire sizes of 22, 24, 26 and 28 AWG [0.4-0.08 mm²]

Electronics

- Wire-to-Post Connectors preloaded with dual beam contacts
- Connectors and headers, except shrouded headers, are end-to-end stackable
- Connector styles include both closed end and feedthru connectors with locking ramps, with and without polarizing tabs
- Molded ribs on housing do not allow reverse mating
- Posted connectors for 2 through 19 positions
- Connectors preloaded with IDC contacts
- All contacts are slotted for insulation displacement (IDC) terminal technique
- Contacts are lubricated for fretting corrosion protection
- Benefits derived from the MTA-100 system include increased quality and ease of handling such as —
 - One-step assembly
 - No wire stripping
 - No contact damage
 - Reduced wiring errors
 - Simpler tooling
 - Simple maintenance and repair
- Meets the material requirements of Table 23.1 of UL1410 Standards for Television Receiver and Video Products (wire-topost connectors only)
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR7189

Technical Documents Product Specification 108-1050 MTA-100 Connectors Application Specifications 114-1019 MTA-100 Connectors 114-1031 MTA-100 Ribbon Cable Assembly

accept discrete and ribbon cable wire sizes ranging from 22-28 AWG [0.4-0.08 mm²] with maximum insulation outside diameter of .060 [1.52] for terminating single wire and .050 [1.27] for mass termination of wires. Tin plated solid, fused stranded, or stranded (7 strands) wire with PVC insulation can be used on 22-28 AWG [0.4-0.9 mm²] MTA-100 connectors and 19 stranded wire on 22-24 AWG [0.4-0.2 mm²] MTA-100 connectors. Only

MTA-100 connectors

one wire to be terminated into an IDC contact slot.

The wire-to-post connector housing material is flame retardant thermoplastic, either UL94V-2 or UL94V-0 rated.

A full line of .100 [2.54] centerline headers completes the system. Headers are available with straight or right-angle posts, in flat, polarized or friction lock styles. Headers are available in 2 through 28 positions. Shrouded headers are available in 2 through 14 positions.

Performance Data*

Voltage Rating — 250 vac

Current Rating — 5 amp max. Low-Level Resistance —

6 m Ω max. initial

Dielectric Withstanding Voltage — 750 vac/1 min.

Insulation Resistance – 5000 M Ω min. initial

Operating Temperature — -55° C to $+105^{\circ}$ C

Note: Refer to page 70 for approved wire listings.

*Refer to the Product Specification for additional electrical, mechanical and environmental performance tests and requirements.

MTA-100 IDC Connectors—Closed End and Feed-Thru

Closed End Connectors

Material and Finish Housing — UL94V-2 rated, nylon, see below for color; or UL94V-0 rated, nylon, black

Contacts - Phosphor bronze, post tin plated, .000030 [0.00076] or .000015 [0.00038] post gold-plated over nickel

Color Coding by Wire Size for UL94V-2 Connectors 28 AWG — Green 26 AWG — Blue

24 AWG — White 22 AWG — Red

All wire sizes in UL94V-0-Black

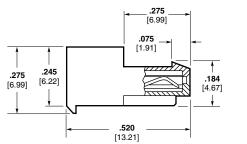

For mateability options, see matrix on pages 12 and 13.

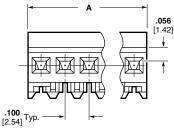

For mating half visuals, see pages 20 thru 30.

Notes:

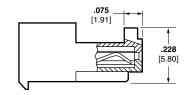

MTA-100 100 [2.54]

- 1. Refer to pages 70-74 for approved wire listing.
- 2. For strain reliefs and dust covers, see page 16.
- 3. For keying plugs, see page 17.
- 4. Other circuit sizes are available upon request. Minimums may apply.
- 5. Connector circuits can be molded closed for keying purposes. Minimums may apply
- 6. Where no part numbers appear in the chart, parts can be made available upon request. Minimums may apply.
- 7. To determine connector overall length (dim. A), multiply .100 x the number of circuits. Example: .100 x 10 circuits equals 1.000 inch [25.4 mm].

Connector Ordering

Information

MTA-100 IDC Connectors—Closed End and Feed-Thru (Continued)

Base Part Numbers

The "Base Part Numbers" Chart at right shows the base part number, and their RoHS (Restrictions on Certain Hazardous Substances) Compliant (lead free) equivalent available for the described connectors. Prefixes and suffixes are determined by the number of circuit positions in the connector. For example, the complete part number for a 10-position closed end con-

nector without polarizing tabs for 22 AWG wire would be: Base number 640440 plus prefix-and-suffix

4----0

The correct ordering num-4-640440-0 ber is All part numbers are the RoHS equivalent version. Example:

No. of Pos.	Lead Free RoHS Prefix/Suffix
2	3-640440-2
3	3-640440-3
4	3-640440-4
5	3-640440-5
6	3-640440-6
7	3-640440-7
8	3-640440-8
9	3-640440-9

Closed End Dust Covers

Cover Ordering Information

The "Base Part Numbers" Chart at right shows the base part number and number of circuits available for the described cover.

Prefixes and suffixes are determined by the number of circuit positions in the cover. For example, the complete part number for a 10-position closed end strain relief cover would be:

Base number 643075 plus prefix-and-suffix

1----0

The correct ordering number is

1-643075-0

Cover Length

No. of Circuits	Dim. A	Prefix/ Suffix

MTA-100 IDC Posted Connectors (Wire-to-Wire)—Closed End, Feed-Thru

Feed-Thru

Material and Finish

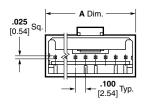

Housing --- UL 94V-2 rated, nylon, see chart for color

Contacts - Copper alloy, post tin or gold plated over nickel (see chart)

Notes:

MTA-100 100 [2.54]

- 1. Mating half visuals pages 14 & 15. 2. Use feed thru strain relief covers & feed
- thru dust covers (if needed) page 16. 3. Approved wire listing - pages 70 thru 74.

Connector Ordering Information

The "Base Part Numbers" Chart at right shows the base part number. Prefixes and suffixes are determined by the number of circuit positions in the connector. For example, the complete part number for a 12-position

closed end connector for 22 AWG wire would be: Base number 647000 plus prefix-and-suffix

4- -- 2

The correct ordering number is 4-647000-2

All part numbers are the RoHS equivalent version. Example:

No. of Pos.	Lead Free RoHS Prefix/Suffix
2	3-647000-2
	thru
19	4-647000-9

See page 15 for an explanation of RoHS lead free equivalents.

Note: All RoHS equivalent part numbers may not be available upon catalog release. If the number you need is not available, please contact Product Engineering to expedite your request.

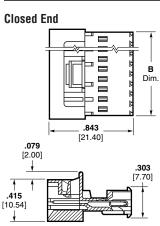

Color Coding by Wire Size for UL 94V-2 Connectors 22 AWG — Red 24 AWG - White 26 AWG - Blue

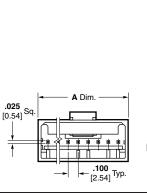

28 AWG — Green

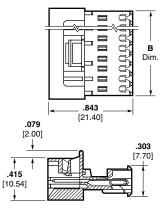

Performance Data

Voltage Rating — 250 VAC Current Rating — 4 amp max. Low-Level Resistance -

16 m Ω max. initial Dielectric Withstanding Voltage — 750 VAC/1 min. Insulation Resistance — $5000 \text{ M}\Omega$ min. initial Operating Temperature —

Electronics

Posts — Copper alloy, tin plated, .000030 [0.00076] or .000015 [0.00038] gold over nickel

Notes:

- 1. Post(s) can be omitted for keying purposes. Specify the desired post(s) to be omitted using the figure to identify Post No. 1.
- 2. Gold headers are duplex plated, gold on mating end of post and tin on the solder tail.
- 3. To determine header overall length (dim. A) multiply .100 x the number of posts. Example: .100 x 10 posts equals 1.000 inch [25.4 mm].

For mateability options, see matrix on pages 12 and 13.

For mating half visuals, see pages 14, 15 and 31.

Header Ordering Information

The "Base Part Numbers" Chart at right shows the base part number.

Prefixes and suffixes are determined by the number of post positions in the header. For example, the complete part number for a 10-position header with straight posts would be:

Base number 641211 plus prefix-and-suffix 4- — -0

The correct ordering number is 4-641211-0

All part numbers are the RoHS equivalent version. Example:

No. of Pos.	Lead Free RoHS Prefix/Suffix
2	3-641211–2
	thru
28	5-641211-8

See page 15 for an explanation of RoHS lead free equivalents.

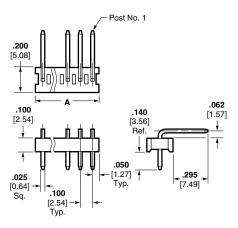

Note: All RoHS equivalent part numbers may not be available upon catalog release. If the number you need is not available, please contact Product Engineering to expedite your request.

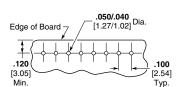

Note:

Select load headers (omitted pin headers) are available upon request. Please contact product engineer or product manager for details.

Posts — Copper alloy, tin plated, .000030 [0.00076] or .000015 [0.00038] gold over nickel Notes:

- 1. Post(s) can be omitted for keying purposes. Specify the desired post(s) to be omitted using the
- figure to identify Post No. 1. 2. Headers without retentive legs are suitable for breakaway application.
- 2 or 3 retentive leg(s) per header, depending upon number of positions.
- 4. Gold headers are duplex plated, gold on mating end of post and tin on the solder tail.
- To determine header overall length (dim. A) multiply .100 x the number of posts minus (-) .012. Example: .100 x 10 posts - .012
 = .988 inches [25.1 mm].

For mateability options, see matrix on pages 12 and 13. For mating half visuals, see pages 14, 15 and 31.

Connector Ordering Information

The "Base Part Numbers" Chart at right shows the base part number.

Prefixes and suffixes are determined by the number of post positions in the header. For example, the complete part number for a 10-position header with straight posts and without retentive legs would be:

Base number **644456** plus prefix-and-suffix

The correct ordering number is 4-644456-0

All part numbers are the RoHS equivalent version. Example:

No. of Pos.	Lead Free RoHS Prefix/Suffix
2	3-644456-2
	thru
28	5-644456-8

See page 15 for an explanation of RoHS lead free equivalents.

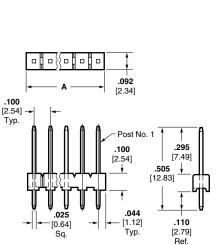

Note: All RoHS equivalent part numbers may not be available upon catalog release. If the number you need is not available, please contact Product Engineering to expedite your request.

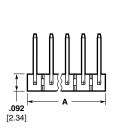

Note:

Select load headers (omitted pin headers) are available upon request. Please contact product engineer or product manager for details.

- 2. Gold headers are duplex plated, gold on mating end of post and tin on the solder tail.
- 3. To determine header overall length (dim. A) multiply .100 x the number of posts. Example: .100 x 10 posts equals 1.000 inch [25.4 mm].

For mateability options, see matrix on pages 12 and 13. For mating half visuals, see pages 14, 15 and 31.

Header Ordering Information

The "Base Part Numbers" Chart at right shows the base part number.

Prefixes and suffixes are determined by the number of post positions in the header. For example, the complete part number for a 10-position header with straight posts would be:

Base number **647047** plus prefix-and-suffix

4- -- 0

The correct ordering number is 4-647047-0

All part numbers are the RoHS equivalent version. Example:

No. of Pos.	Lead Free RoHS Prefix/Suffix
2	3-647047-2
	thru
12	4-647047-2
13	NA
	thru
18	NA

See page 15 for an explanation of RoHS lead free equivalents.

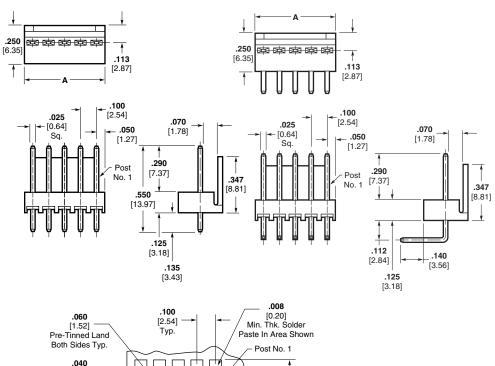

Note: All RoHS equivalent part numbers may not be available upon catalog release. If the number you need is not available, please contact Product Engineering to expedite your request.

Maximum Temperature Rating: 2–12 Position: 280°C 13–18 Position: 235°C

.100 [2.54] Centerline CST-100 II Crimp Contacts and Housings

Product Facts

- Low cost wire-to-board interconnections
- Wide wire range for single contact
- Tin and gold plated contacts
- Mates with specified MTA and similar competitive notched headers
- Plastic latching feature in housing helps prevent contact backout
- Locking ramps and polarizing tabs are standard
- For keying purposes use keying plug 641994-1 (page 17)
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR7189

For mateability options, see matrix on pages 12 and 13.

For mating half visuals, see pages 21 thru 29 and 32. See page 15 for an explanation of RoHS lead free equivalents.

.156 [3.96] Centerline MTA-156 IDC Connectors and Headers

Product Facts

₹ Тусо

 Connectors and headers for 2 through 24 positions; wire sizes of 18, 20, 22, 24 and 26 AWG [0.9–0.12 mm²]

Electronics

- Connectors and headers, except shrouded headers, are end-to-end stackable
- Quad Connectors for higher current rating (page 54)
- Posted connectors for 2, 3, 4, 6, 9, 12, 15 and 24 positions
- Card edge connectors for 3, 6, 9, 12, 15, 18 and 20 through 24 positions
- Connectors preloaded with IDC contacts
- All contacts are slotted for insulation displacement (IDC) termination technique
- Connector styles include both closed end and feedthru, with and without locking ramps and polarizing tabs
- Molded ribs on housing do not allow reverse mating
- Contacts are lubricated for fretting corrosion protection
- Benefits derived from the MTA-156 system include increases quality and ease of handling such as —
 - One-step assembly
 - No wire stripping
 - No contact damage
 - Reduced wiring errors
 - Simpler tooling
 Simple maintenance
 - and repair
- Meets the material requirements of Table 23.1 of UL 1410 Standards for Television Receiver and Video Products (wire-topost connectors only)
- Recognized under the Component Program of Underwriters Laboratories Inc.,
 File No. E28476
- Certified by Canadian Standards Association, File No. LR7189

MTA-156 connectors accept discrete and ribbon cable wire sizes ranging from 18-26 AWG [0.9-0.12 mm²] with maximum insulation outside diameter.095 [2.41] for single wire and .070 [1.78] for mass termination of wires. Tin plated solid, fused stranded or stranded (7, 16, and 19 strands) wire with PVC insulation can be used on 18 AWG [0.8-0.9 mm²] MTA-156 connectors: 7, 10, and 19 stranded wire on 20 AWG [0.5-0.6 mm²] MTA-156 connectors; and 7 and 19 stranded wire on 22-26 AWG [0.4-0.12 mm²] MTA-156 connectors.

Only one wire to be terminated into an IDC contact slot.

Mass termination of wire provides the lowest applied cost because it drastically reduces the labor content of virtually any cable or harness assembly required. The wire-to-post connector housing material is flame retardant thermoplastic, either UL94V-2 or UL94V-0 rated.

A full line of .156 [3.96] centerline headers completes the system. Headers are available with straight or right-angle posts, in flat friction lock and shrouded styles. Headers are available in 2 through 24 positions. Performance Data*

Voltage Rating — 600 vac Current Rating — 7 amp max. for MTA-156 Connector

Low-Level Resistance — $3.0 \text{ m}\Omega$ max. initial

Dielectric Withstanding Voltage — 2200 vac/1 min.

Insulation Resistance — 5000 M Ω min. initial

Operating Temperature — -55° C to $+105^{\circ}$ C

*Refer to the Product Specification for additional electrical, mechanical and environmental performance tests and requirements.

Matrix for Tin Plated Part Numbers

This matrix has been prepared to assist you, our customer, in defining the correct mating halves for the MTA-156 header and connector combination. Where a "Y" is indicated the combination is a valid mating pair. Where an "N" is indicated the combination is not acceptable for mating.

Connectors

Closed End with Locking Ramp

MTA-156 IDC Connectors—Closed End

Material and Finish

Housing — UL94V-2 rated, nylon, see below for color; or UL94V-0 rated, nylon, black

Contacts — Phosphor bronze, post tin plated, .000030 [0.00076] or .000015 [.00038] post gold plated over nickel

Color Coding by Wire Size for UL94V-2 Connectors

U

All Wire Sizes in UL94V-0 — Black

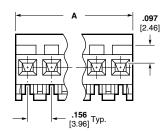

_

MTA-156 .156 [3.96]

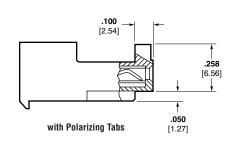

Notes:

- 1. Only connectors with locking ramp and without polarizing tabs mate with posted connectors on page 45.
- 2. Refer to pages 70 thru 74 for approved wire listing.
- 3. For strain reliefs and dust covers, see pages 40 and 41.
- For keying plugs and panel mount end caps, see page 42.
 Other circuit sizes are available
- upon request. Minimums may apply.
- Connector circuits can be molded closed for keying purposes. Minimums may apply.
- Where no part numbers appear in the chart, parts can be made available upon request. Minimums may apply.
- To determine connector overall length (Dim. A), multiply .156 x the number of circuits. Example: .156 x 10 circuits equals 1.560 inches [39.62 mm].

.355 .325 [9.02] [8.26] .725 [18.42]

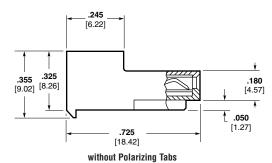

without Polarizing Tabs

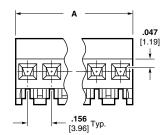

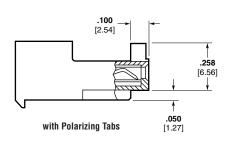

For mateability options, see matrix on pages 34 and 35.

Mating half visuals for Closed End Connectors with Locking Ramp, see pages 45 thru 48, 50, 52, and 53, (49 and 51 Front Bend Headers Only).

Closed End without Locking Ramp

For mateability options, see matrix on pages 34 and 35.

Mating half visuals for Closed End Connectors without Locking Ramp, see pages 46 thru 53.

Connector Ordering Information

€Тусо

The "Base Part Numbers" Chart at right shows the base part number and number of circuits available for the described connectors.

Prefixes and suffixes are determined by the number of circuit positions in the connector. For example, the complete part number for a 10-position closed end connector with locking ramp and without polarizing tabs for 18 AWG wire would be:

Base number 640426 plus prefix-and-suffix

4----0

The correct ordering number is

4-640426-0

All part numbers in **bold face** are the RoHS equivalent version. Example:

No. of Pos.	Lead Free RoHS Prefix/Suffix
2	3-640426-2
3	3-640426-3
4	3-640426-4
5	3-640426-5
6	3-640426-6
7	3-640426-7
8	3-640426-8
9	3-640426-9
10	4-640426-0
11	4-640426-1
12	4-640426-2
13	4-640426-3
14	4-640426-4
15	4-640426-5
16	4-640426-6
17	4-640426-7
18	4-640426-8
19	4-640426-9
20	5-640426-0
21	5-640426-1
22	5-640426-2
23	5-640426-3
24	5-640426-4

Note: All RoHS equivalent part numbers may not be available upon catalog release. If the number you need is not available, please contact Product Engineering to expedite your request.

South America: 55-11-2103-6000 Hong Kong: 852-2735-1628 Japan: 81-44-844-8013 UK: 44-208-420-8341

MTA-156 IDC Connectors—Feed-Thru

Feed-Thru with Locking Ramp

Material and Finish

€Тусо

Housing — UL94V-2 rated, nylon, see below for color; or UL94V-0 rated, nylon, black

Electronics

Contacts — Phosphor bronze; post tin plated, .000030 [.00076] or .000015 [.00038] post gold plated over nickel

Color Coding by Wire Size for

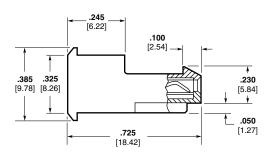

UL94V-2 Connectors
26 AWG — Blue
24 AWG — White
22 AWG — Red
20 AWG — Yellow
18 AWG — Orange

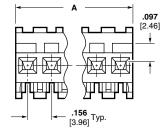

All Wire Sizes in UL94V-0-

Black

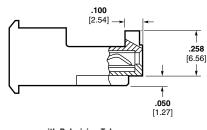

Notes:

- 1. Only connectors with locking ramp and without polarizing tabs mate with posted connectors on page 45.
- 2. Refer to pages 70 thru 74 for approved wire listing.
- For strain reliefs and dust covers, see pages 40 and 41.
 For keying plugs and panel
- mount end caps, see page 42.
- 5. Other circuit sizes are available upon request. Minimums may apply.
- Connector circuits can be molded closed for keying purposes. Minimums may apply.
- Where no part numbers appear in the chart, parts can be made available upon request. Minimums may apply.
- To determine connector overall length (Dim. A), multiply .156 x the number of circuits. Example: .156 x 10 circuits equals 1.560 inches [39.62 mm].

without Polarizing Tabs

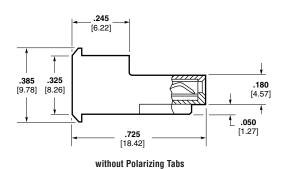

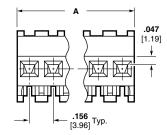

with Polarizing Tabs

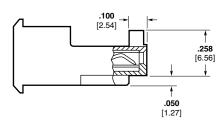

For mateability options, see matrix on pages 34 and 35.

Mating half visuals for Feed–Thru Connectors with Locking Ramp, see pages 45 thru 48, 50, 52, and 53, (49 and 51 Front Bend Headers Only).

Feed-Thru without Locking Ramp

with Polarizing Tabs

For mateability options, see matrix on pages 34 and 35. Mating half visuals for Feed–Thru Connectors without Locking Ramp, see pages 46 thru 53.

MTA-156 IDC Connectors—Feed-Thru (Continued)

Connector Ordering Information

The "Base Part Numbers" Chart at right shows the base part number and number of circuits available for the described connectors.

Prefixes and suffixes are determined by the number of circuit positions in the connector. For example, the complete part number for a 10-position feed-thru connector with locking ramp and without polarizing tabs for 18 AWG wire would be:

Base number 640599 plus

prefix-and-suffix

4- — -0

The correct ordering number is

4-640599-0

The part numbers in **bold face** are the RoHS equivalent version. Example:

No. of Pos.	Lead Free RoHS Prefix/Suffix
2	3-640599-2
3	3-640599-3
4	3-640599-4
5	3-640599-5
6	3-640599-6
7	3-640599-7
8	3-640599-8
9	3-640599-9
10	4-640599-0
11	4-640599-1
12	4-640599-2
13	4-640599-3
14	4-640599-4
15	4-640599-5
16	4-640599-6
17	4-640599-7
18	4-640599-8
19	4-640599-9
20	5-640599-0
21	5-640599-1
22	5-640599-2
23	5-640599-3
24	5-640599-4

Note: All RoHS equivalent part numbers may not be available upon catalog release. If the number you need is not available, please contact Product Engineering to expedite your request.

MTA-156 .156 [3.96]

Catalog 82056 Revised 6-08

www.tycoelectronics.com

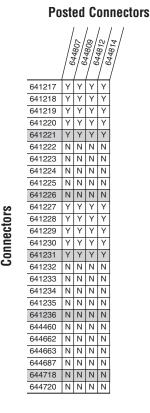

Dimensions are in inches and millimeters unless otherwise specified. Values in brackets are metric equivalents. Dimensions are shown for reference purposes only. Specifications subject to change. USA: 1-800-522-6752 Canada: 1-905-470-4425 Mexico: 52-55-1106-0800 C. America: 57-1-254-4444 South America: 55-11-2103-6000 Hong Kong: 852-2735-1628 Japan: 81-44-844-8013 UK: 44-208-420-8341

MTA-156 Posted Connector/Connector Mateability Guide (Continued)

This matrix has been prepared to assist you, our customer, in defining the correct mating halves for the MTA-156 posted connector and connector combination. Where a "Y" is indicated the combination is a valid mating pair. Where an "N" is indicated the combination is not acceptable for mating.

MTA-156 IDC Posted Connectors (Wire-to-Wire)—Closed End, Feed-Thru

ΠH

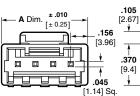

□

岡

Material and Finish

Housing — UL 94V-2 rated, nylon, see chart for color

Contacts --- Copper alloy, post tin or .000030 [.00076] gold plated over nickel

Notes:

1. Mating half visuals - pages 36 thru 39. 2. Strain relief & dust covers - pages 40 & 41

3. Approved wire listing - page 70.

Connector Ordering Information

The "Base Part Numbers" Chart at right shows the base part number and number of circuits available for the described connectors.

Prefixes and suffixes are determined by the number of circuit positions in the connector. For example, the complete part number for a 12-position closed end connector for 18 AWG wire would be:

Base number 641435 plus prefix-and-suffix

4- -- 2

The correct ordering number is 4-641435-2

See page 15 for an explanation of RoHS lead free equivalents.

Note: All RoHS equivalent part numbers may not be available upon catalog release. If the number you need is not available, please contact Product Engineering to expedite your request.

Color Coding by Wire Size for UL 94V-2 Connectors

Performance Data

Voltage Rating - 600 VAC

Current Rating -7 amp max.

Low-Level Resistance -7 m Ω max. initial

Dielectric Withstanding Voltage-1500 VAC/1 min. Insulation Resistance -5000 M Ω min. initial

Operating Temperature — -55° C to +105° C

MTA-156 Flat Headers—Straight

Material and Finish

 $\begin{array}{l} \textbf{Housing} \longrightarrow \text{UL94V-0 rated, polyester,} \\ \text{white} \end{array}$

Posts — Copper alloy, tin plated, .000030 [0.00076] or .000015 [0.00038] gold over nickel

Notes:

- Post(s) can be omitted for keying purposes. Specify the desired post(s) to be omitted using the figure to identify Post No. 1.
- 2. Gold headers are duplex plated, gold on mating end of post and tin on the solder tail.
- .125 [3.18] solder tail lengths are for .062 [1.57] thick printed circuit boards and .175 [4.45] solder tail lengths are for .093-.125 [2.36-3.18] thick printed circuit boards.
- 4. To determine header overall length (Dim. A), multiply .156 x the number of posts. Example: .156 x 10 posts equals 1.560 inches [39.62 mm].

For mateability options, see matrix on pages 34, 35, 54 and 58.

For mating half visuals, see pages 36 thru 39, 55, 60 and 62.

Header Ordering Information

The "Base Part Numbers" Chart at right shows the base part number and number of posts available for the described headers.

Prefixes and suffixes are determined by the number of post positions in the header. For example, the complete part number for a 10-position header with square posts and a .125 [3.18] solder tail length would be: Base number **640383** plus

prefix-and-suffix

4- -- **0**

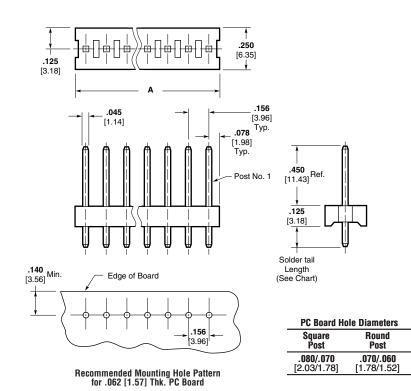

The correct ordering number is 4-640383-0

The part numbers in **bold face** are the RoHS equivalent version. Example:

No. of Pos.	Lead Free RoHS Prefix/Suffix
2	3-640383–2
	thru
24	5-640383-4
24	

See page 15 for an explanation of RoHS lead free equivalents.

Note: All RoHS equivalent part numbers may not be available upon catalog release. If the number you need is not available, please contact Product Engineering to expedite your request.

Note: Consult Product Drawing for details on placing headers onto PC boards.

MTA-156 Polarized Lock Headers—Straight

Material and Finish

₹ Тусо

Housing ---- UL94V-0 rated, polyester, white

Posts — Copper alloy, tin plated or .000030 [0.00076] gold over nickel

Notes:

- Post(s) can be omitted for keying purposes. Specify the desired post(s) to be omitted using the figure to identify Post No. 1.
- 2. Peg holes are not required in PC Boards when headers without pegs are used.
- One peg only on a 2 position header, З. other position sizes have two pegs. Headers with .00015 [0.00038] gold
- 4. plated post are available upon request. Minimums may apply.
- To determine header overall length (Dim. A), multiply .156 x the number of 5. posts. Example: .156 x 10 posts equals 1.560 inches [39.62 mm].

For mateability options, see matrix on pages 34, 35, 54 and 58

For mating half visuals, use connectors with a locking ramp for polarization/retention purposes, see pages 36 thru 39, 55, 60 and 62.

For polarizing purposes only use connectors without a locking ramp. See pages 36 thru 39, 60 and 62.

Header Ordering Information

The "Base Part Numbers" Chart at right shows the base part number and number of posts available for the described headers.

Prefixes and suffixes are determined by the number of post positions in the header. For example, the complete part number for a 10-position header with square posts with peas would be:

Base number 644615 plus prefix-and-suffix

4- -- 0

The correct ordering number is 4-644615-0

The part numbers in **bold** face are the RoHS equivalent

version. Example:

No. of Pos.	Lead Free RoHS Prefix/Suffix
2	3-644615–2
	thru
18	4-644615-8

See page 15 for an explanation of RoHS lead free equivalents.

MTA-156 IDC Quad Connectors

Product Facts

- Provides four points of contact
- Greater current carrying capability than Standard MTA-156 Connectors
- Connector styles include both closed end and feedthru with locking ramp, with and without polarizing tabs in 2 through 12 positions
- Available for wire ranges of 18-22 AWG [0.9-0.3 mm^{*}]
- Contacts are lubricated for fretting corrosion protection
- Complies with Tyco Electronics Quality Specification 102-6, "Preparation of Design Objectives"
- Uses existing MTA application tooling for termination
- Quad connectors preloaded with contacts
- All contacts are slotted for insulation displacement (IDC) termination technique
- Connectors and headers are end-to-end stackable
- AWG size is "frosted" on the side of the connector
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189
- Satisfies the VDE requirements according to VDE 110, Insulation Group B, 250 vac for air and creepage paths

The MTA-156 Quad Connector provides a connection with four points of contact. The UL94V-0 rated connector with multi-point contacts provides greater current carrying capability than the Standard MTA-156 Connector. These connectors comply with Tyco Electronics Quality Specification 102-6* and satisfy the VDE requirements according to VDE 110.

The connectors are available for wire ranges of 18–22 AWG [0.9–0.3 mm²] and in a variety of styles including closed end and feed-thru with locking ramp, with and without polarizing tabs.

Only one wire to be terminated into an IDC contact slot.

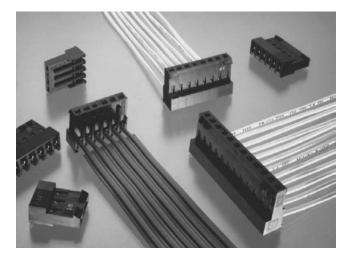

*The 102-6 Quality Specification is the new procedure for "Preparation of Design Objectives". Its purpose is to provide a means for verifying the maximum current carrying capacity of the device.

Note: Refer to pages 70 through 74 for approved wire listings.

This matrix has been prepared to assist you, our customer, in defining the correct mating halves for the MTA-156 header and connector combination. Where a "Y" is indicated the combination is a valid mating pair.

Connector Ordering Information

The "Base Part Numbers" Chart above shows the base part number and number of circuits available for the described connectors. Prefixes and suffixes are determined by the number of circuit positions in the connector. For example, the complete part number for a 10-position closed end connector with locking ramp and without polarizing tabs for 18 AWG wire would be:

Base number 644329 plus prefix-and-suffix The correct ordering number is

1-644329-0

The set of numbers in **bold face** are the RoHS equivalent version of the standard product. Example:

No. of Pos.	Standard Prefix/Suffix	Lead Free RoHS Prefix/Suffix
2	644329–2	3-644329–2
	thru	
12	1-644329-2	4-644329-2

See page 15 for an explanation of RoHS lead free equivalents

Note: All RoHS equivalent part numbers may not be available upon catalog release. If the number you need is not available, please contact Product Engineering to expedite vour request.

MTA-156 .156 [3.96]

.156 [3.96] Centerline SL-156 Crimp Contacts and Housings

Product Facts

- Rugged wire-to-board interconnection to mate with .045 square or round post headers or staked posts on .156 centers
- Standard Connectors accept wire range of 18-24 AWG [0.9-0.2 mm⁻] and LID **Connectors accept wire** range of 18-24 AWG [0.9-0.2 mm*] and a limited 16 AWG [1.29–1.42 mm⁻⁻] (2550-2800 CMA)
- Two-piece interconnection system (connector/header)
- Housing made of flame retardant nylon
- Available in 1- through 24-position connector configurations

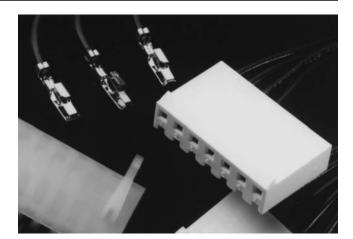

SL-156 .156 [3.96]

- Connectors are end-to-end stackable
- Wire-to-board system offers polarization with friction lock for positive mating

- Meets the material requirements of Table 23.1 of UL1410 Standard for **High-Voltage Television Receivers and Video** Productions
- Recognized under the **Component Program of** Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian **Standards** G₽® Association, File No. LR7189

Technical Documents Product Specification 108-1049, 108-1049-1, 108-1049-2 Application Specification

114-1021

The AMP SL-156 connectors shown on the following pages are designed to mate with .045 [1.14] square or round post headers or staked posts on .156 [3.96] centers.

The wire-to-board connector is a two-piece connector system with the wire crimped to the contact, then inserted into the housing. This product mates with the MTA-156 flat, polarized and friction lock header, or staked posts (not MTA-156 shrouded headers).

Headers

Performance Data

Voltage Rating - 250 vac Current Rating 10 amp max. at 250 vac Low-Level Resistance —

 $3.0 \text{ m}\Omega$ max. initial

Dielectric Withstanding Voltage-2000 vac/1 min.

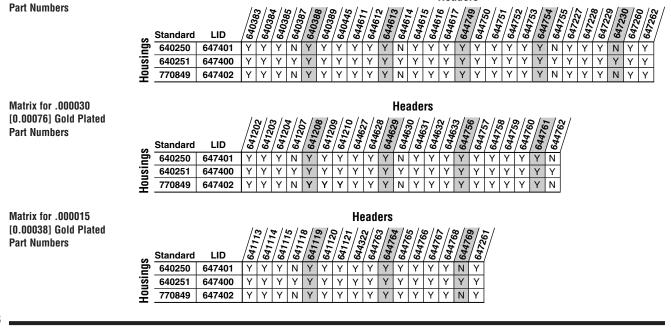

Insulation Resistance -1000 M Ω min. initial

Operating Temperature — -55° C to +105° C

The Large Insulation Diameter (LID) Contacts and Housings are for use in applications where wire insulation is up to .112 [2.84] in diameter.

These matrixes represent only the housing and header combinations. You also need to consider the plating on the contacts and headers. Gold contacts with gold headers and tin contacts with tin headers.

SL-156 Housings—Wire-to-Board

Housings

Material (RoHS Compliant)

UL94V-0 rated, nylon, white

Notes:

SL-156 .156 [3.96]

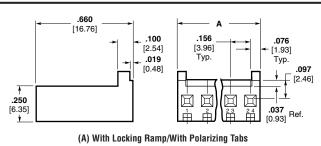

- 1. Accepts either .045 [1.14] square or round posts. Housings mate with flat and friction lock headers, or staked posts on .156 [3.96] centers.
- Housings without ramp, with polarizing tab, available upon request. Minimums may apply.
- Recommend contact: Part No. 640252 for 1 thru 12 positions; Part No. 350980 for 13 thru 24 positions; Part No. 770476 for 1 thru 24 positions.

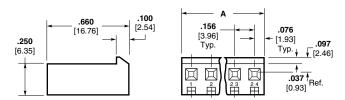

For contacts, see page 59.

For mateability options, see matrix on page 58.

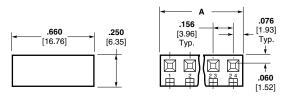

For mating half visuals, for connectors with locking ramp, see pages 46, 47, 48, 50 and 52, (49 and 51 Front Bend Headers only.)

For mating half visuals, for connectors without locking ramp, see pages 46 thru 52.

(B) With Locking Ramp/Without Polarizing Tabs

(C) Without Locking Ramp/Without PolarizingTabs

Note: Dim. A = $0.156 \times (No. of Positions - 1) + 0.152$

SL-156 Housings and Contacts for Large Insulation Diameter (LID) Wire

Housings

Material (RoHS Compliant)

- UL 94V-0 rated, nylon, white
- Notes:
- 1. Accepts Standard and LID contacts.
- 2. Larger opening in housings eases contact insertion when using wires that have large insulation diameters (.100-.112 [2.54-2.84]).
- 3. Housings are not End-to-End stackable.

For mateability options, see matrix on page 58.

For mating half visuals, for connectors with locking ramp, see pages 46, 47 48, 50 and 52, (49 and 51 Front Bend Headers only.) For mating half visuals, for connectors without locking ramp, see pages 46 thru 52.

Contacts Material and Finish

.012 [0.3] bright tin plated phosphor bronze; .012 [0.3] phosphor bronze with .000030 [0.00076] gold over nickel (see chart)

AMP Economy Power (EP) Wire-to-Board Connector System

Product Facts

- .156 [3.96], .200 [5.08] and .312 [7.92] centerline
- Wire-to-board connectors comprised of plug housings, receptacle contacts for discrete wire, and mating post headers
- Hooded contact designed to accept wire with insulation diameters up to .118 [3.00]
- Positive locking feature built into header back wall
- Locking mechanism on connector housing maximizes retention
- Number of positions: 1 to 11 for .156 [3.96] centerline; 2 to 12 for .200 [5.08] centerline; and 2 to 5 for .312 [7.92] centerline
- Straight, through-hole headers
- Positive latch design for easier mating and unmating
- Polarization tabs help prevent post misalignment and mismating
- Low-profile mating height of .641 [16.3] for 2 to 11 positions
- Straight headers are end-toend stackable to conserve PCB space
- Header packaging: bulk pack and tube loaded
- Plug housings and post headers intermateable with JST VH connectors
- Directive 2002/95/EC (RoHS Compliant
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

Applications

 Household appliances, garage door openers, power supplies, power connections, or other areas requiring additional connector retention AMP Economy Power (EP) Connectors are designed for secondary power circuit applications. They consist of wire-to-pc board plug housings (for receptacle contacts) and mating post headers. Three contact centerline spacings are available: .156 [3.96], .200 [5.08] and .312 [7.92].

During mating, the positive locking lever on the outside of the plug housing engages the mating header housing to provide for greater retention. This helps maintain reliable connections, when other non-locking type connectors could vibrate apart. This same locking lever must be depressed to unmate the connectors.

The locking mechanism is also located high enough to help avoid interference with pc board clear plastic coating (potting), which is a common treatment for many home appliances. Headers with .156 [3.96] centerline are offered in 2 through 11 positions; 2 through 12 positions for .200 [5.08] centerline; and .312 [7.92] centerline are available in 2 through 5 positions. Both versions are provided in bulk pack or in tubes for automatic machines.

The slim, straight, post headers are stackable endto-end for greater flexibility when designing pc board configurations.

The mating height of a low-profile plug and vertical header is .642 [16.3]; even the 1-position high-profile style measures only .732 [18.6] above the pc board. Compact dimensions like these are well suited for most applications in confined spaces.

Performance Characteristics

Voltage Rating — 250 VAC Current Rating — 7.5 amp max. (2 to 11 pos.), 8 amp max. (1 pos.) Low Level Overall Resistance– Initial — 10 m Ω max. Final — 20 m Ω max.

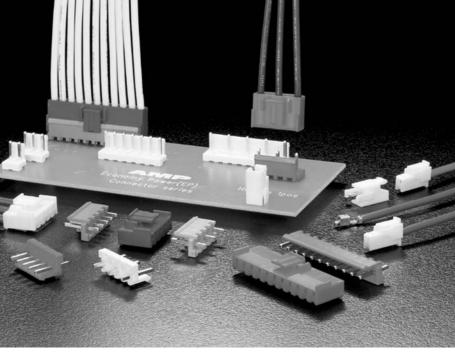

Dielectric Withstanding Voltage — 1.5 kV AC, 1 min.

 $\begin{array}{l} \mbox{Insulation Resistance} & -- \\ \mbox{Initial} & -- 1000 \ M\Omega \ min. \\ \mbox{Final} & -- 500 \ M\Omega \ min. \\ \mbox{Durability} & -- 50 \ mating \ and \ unmating \end{array}$

cycles **Operating Temperature** — -13°F to +221°F [-25°C to +105°C] **Wire Size Range** — 18-22 AWG [0.89-0.30 mm²] **Insulation Diameter** — 118 [3 00]

Insulation Diameter — .118 [3.00] max.

Note: When selecting approved wire styles noted on this list, the MTA Application Specifications guidelines must be followed. Also, due to wire variations in insulation wall thickness, hardness and wire stranding we would recommend evaluating the wire selected before final application approval.

MTA-100 Ribbon Cable Preparation

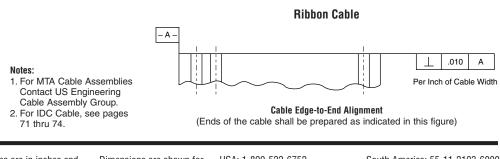

MTA-156 Ribbon Cable Preparation

† The dimensions shown represent the recommended minimum and maximum for notches; the actual dimension will depend on your application requirements.

Notes:

- 1. Cable shall be notched, as indicated in the individual ribbon cable connector assembly drawing, according to the requirements specified in these figures. Conductor shall not be exposed after notching, nor shall individual wire stands be cut or nicked.
- 2. U.L. Style #2651 ribbon cable is approved for use with MTA-100 and MTA-156 connectors per Application Specification 114-1031 and 114-1032.

 Compatible with a variety of Insulation Displacement Connectors

Electronics

- Available on .025 [0.63], .0394 [1.00], .050 [1.27], .100 [2.54] and .156 [3.96] centerline
- Color code edge mark on conductor #1
- Gray flame retardant flexible PVC insulation
- Insulation rated for temperature of -20°C to +105°C
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E53793

Tyco Electronics Corporation has an expanding array of MADISON CABLE planar PVC insulated product designed for compatibility with a variety of Insulation Displacement Connectors. AMP IDC terminations offer a quick, reliable, cost-effective cabling system which can be automated. The .100 [2.54] centerline cable is available in 28 to 22 AWG, either as tinned or as overcoated tinned wire, in 2 to 28 conductors.

The .156 [3.96] centerline is available in 22 AWG and 18 AWG, either as tinned or overcoated tinned, in 2 to 24 conductors. IDC Ribbon Cable is produced to tighter standards than usually required for high yield insulation displacement terminations. The extra precision offers uncomplicated operation in fully automatic stripping, notching and termination equipment.

Prepared IDC Ribbon Cable

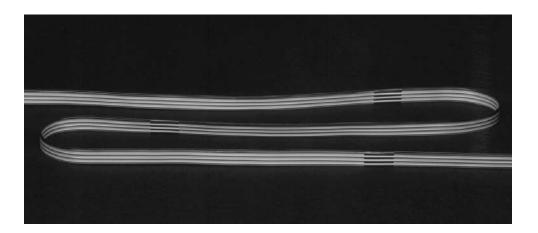

In addition to bulk cable, the US Engineering Cable Assembly Group offers Prepared Cable for the .100 [2.54] and .156 [3.96] centerline cables. This can be in the form of prenotched cable on reels or cut-tolength cable segments.

Prenotched 250 foot reels of cable can be produced with notches at varying increments or repeating all along the cable. The maximum width of these cables is 20 conductor for the .100 [2.54] centerline and 13 conductor for the .156 [3.96] centerline.

Prepared Cable is also available with a Strip and Retain feature allowing the cable assembly to be soldered directly to the PC Board. This saves space and cost and reduces spare parts inventory. Strip and Retain on both ends is used in family board applications to maintain the

electrical connection when the PC Board is separated into smaller boards after soldering. Widths are limited to 20 conductors for the .100 [2.54] centerline and 13 conductors for the .156 [3.96] centerline. However, multiple cables can be placed side-by-side in a single connector. For other styles and configurations contact the product engineer or product manager.

One-At-A-Time Termination Tooling (Typical Tooling Combinations)

Electronics

Manual Hand Tool with Interchangeable Head

Power Units

₹ Тусо

Manual Hand Tool — Pistol Grip Handle Part No. 58074-1

- Easy to use
- Ratchet control will not release the trigger until it is fully bottomed
- Head may be rotated for user convenience

Air Hand Tool with Interchangeable Head

Air Hand Tool — Pistol Grip Pneumatic Handle Part No. 58075-1

- Light weight
- Operates at air pressure between 40 and 70 psi [2.76 and 4.83 bar]
- Head may be rotated for user convenience

Air Bench Mount Tool with Interchangeable Head and Foot Switch

Air Bench Mount Tool — Bench Mount Power Assembly Part No. 58338-1

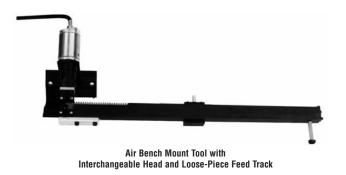

- May be mounted with interchangeable head pointed up or down
- Operated by a foot switch
- Operates at air pressure between 40 and 70 psi [2.76 and 4.83 bar]

Electric Bench Machine with Interchangeable Head

Electric Bench Machine — IDC Power Unit Part No. 931800-1

- All electric: 120 VAC, 60 Hz, 2 A
- Compact, portable and quiet
- Operated by a foot switch

Electric Bench Machine with Interchangeable Head and Tape Feed Track

AMP-O-LECTRIC Bench Machine with Special Applicator

Interchangeable Heads and Applicators (Refer to page 76 for part numbers.)

Interchangeable Head

- Terminates one unstripped wire per cycle
- Aligns and holds the connector in place for each termination
- Automatically advances the connector after each termination

Interchangeable Head and Loose-Piece Feed Track

- No special setup required
- Connectors are easily loaded into feed track
- Connectors are fed using a simple spring-loaded pusher

T-Handle Maintenance Tool

Interchangeable Head and Tape Feed Track

- No special setup required
- Tape-mounted connectors are transferred from product reel to feed track by simply pulling on the free end of the carrier tape
- Connectors are fed using a simple spring-loaded pusher

Special Applicator

- Connectors are easily hand loaded into feed track
- Automatically advances the connector after each termination
- Cannot be cycled until the connector is properly positioned

Manual Bench Tool with Applicator and Holding Fixture

Power Units

₹ Тусо

Manual Bench Tool — Arbor Frame Assembly Part No. 58024-1

- Applicator and holding fixture can be oriented for operator convenience for closed-end or feed-thru terminations
- Ram height (insertion depth) is easily adjusted
- May be bench mounted

Air Harness Tool with Applicator

Air Harness Tools — Hand-Held Power Unit with Applicator Part No. 58575-1 (MTA-100) Part No. 58576-1 (MTA-156)

- Applicator can be rotated 360° for orientation with holding fixture
- Insertion depth is easily adjusted
- Operates at air pressure between 75 and 95 psi [5.17 and 6.55 bar]

Air Bench Machine

Air Bench Machine — Pneumatic Unit Part No. 91112-2

- Operated by a foot switch
- Operates at air pressure between 80 and 90 psi [5.52 and 6.21 bar]
- Not recommended for notching cable with more than 14 conductors

2700 lb Air Bench Machine with Ribbon Cable Notcher Assembly

2700 lb Air Bench Machine — Part No. 312522-1

- Operated by a foot switch
- Capable of exerting 2,700 lb [12,000 N] of force at minimum 80 psi [5.52 bar] air pressure
- May be bench mounted

Applicators and Notcher Assemblies

Manual Bench Tool with Applicator and Tape Feed Track

Applicator and Holding Fixture

- Wires are laced into plastic combs for mass termination
- Trims excess wire for closed-end terminations
- Holding fixture may be mounted to a harness board

Applicator and Tape Feed Track

- Tape-mounted connectors are transferred from product reel to feed track by simply pulling on the free end of the carrier tape
- Connectors are fed using a simple spring-loaded pusher
- Feed stop easily adjusted for different connector sizes

Ribbon Cable Notcher Assembly

- Notch cable with up to 28 conductors for .100 centerline, and 24 conductors for .156 centerline
- Pressure plate holds cable in position during notching
- Scrap conveniently removed through a chute with a blast of air from a built-in air valve

Ribbon Cable Notcher Assembly

Part Number	Wire Size AWG	Centerline	Used With
854449-2	26-28	.100 2.54	Manual Bench Tool 58024-1
854449-4	22-28	.100 2.54	Air Bench Machine 91112-2
854449-3	18-24	.156 3.96	2700 lb Bench Machine 312522-1 AMP-0-LECTRIC Bench Machine 1-471273-3 (with Conversion Kit 690675-2)

Use Adapter 854468-1 when putting Notcher in the AMP-O-LECTRIC Machine. Use Adapter 854468-2 when putting Notcher in the 2700 lb Air Bench Machine.

MTA Application Tooling Options (Continued)

Technical Documents The following is a list of technical documents covering the installation, operation, adjustment, maintenance and repair of MTA application tooling.

> Instruction Sheets (IS) provide instructions for assembling or applying the product. They are intended for the Manufacturing Assembler or Operator.

> **Customer Manuals (CM)** provide complete, detailed instructions on the installation, operation, adjustment, maintenance and repair of complex tools and application machines.

> Applicator Instructions (AI) are similar to instruction sheets (which cover products and tools), and provide instructions for installation, adjustment and maintenance of applicators used in automatic and semiautomatic machines.
