Cable connectors are fully assembled on Mini Coax side by HARTING, free conductors side can also be assembled by customer

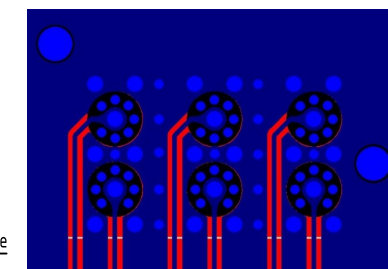

In addition to the hot-air-level (HAL), other PCB surfaces are getting more important. Due to their different properties - such as mechanical strength and coefficient of friction - we recommend the following configuration of PCB through holes.

Mini Coax standard
angled = male = plug
for daughtercards

'Ground' for these pins to be layouted as one PCB-layer, 'Signal' to be traced individually on separate PCB-layer.

Signal = red
Ground = blue
