

PRODUCT SPECIFICATION

Brand	C.K
Product Range	Set of Soldering Iron with lead free Solder Wire
Catalogue number	495012AVI
Date	01/08/2015

Range Description Soldering Irons with Solder Wire
Features Soldering Iron 40 Watt – Euro Plug • Heavy duty construction – for professional use • GS & VDE approved – independently certified • Long life tip – suitable for use with lead free solder • Support stand included Solder Wire 500g reel, 1 mm • Lead Free Special Alloy • 2.5 % Flux incorporated • Sn99Cu1

Standards compliance	VDE approved product												
User health and safety information	Users are directed to carefully read and observe the operating instructions												
RoHS/WEEE compliance	RoHS – these products are implicated within the scope of the legislation, Carl Kammerling International hold evidence of compliance, available on request Carl Kammerling International is a registered producer of RoHS compliant products WEEE - markings on C.K soldering Irons are compliant with WEEE directives												
Material safety data	None applicable												
Warranty	C.K soldering irons are guaranteed for life against imperfect materials or workmanship												
Country of origin	Germany												

Information on lead free Solder Wire

Technical product information	Approximate wire length 1mm: 56m
Standards compliance	Solder wire ISO-core “RA”S-Sn99Cu1, DIN EN 29453 (Sn99,3CU0.7 – eutectic), Lead free special alloy, 2.5% flux content according to DIN EN 29454, 1.1.2.B (EN 61190 – ROM1)
User health and safety information	Always use suitable protective apparel when working with flame and molten metal
RoHS/WEEE compliance	This product range does not fall within the scope of RoHS or WEEE regulations

Material safety data	None applicable
Warranty	None applicable
Country of origin	Germany
