

VER - 26473

VER - 27100

Description

This is a straight grounding cord, with either a 10mm male snap stud or 10mm female snap socket and two 4mm banana jacks in the molded head. The banana jacks provide grounding for two wrist straps. The other end of the grounding cord is terminated by a 5mm ring terminal, a 4mm plug or a 10mm socket. A common ground point or earth bonding point (EBP) ties together several elements of an EPA such as bench working surface, floor mat or wrist strap. In this manner, all are kept at the same electrical potential.

Note: Cord does not include a current limiting resistor.

Specification

| | |
|-----------------------------|-------------------|
| Conductor: | 7 end tinsel wire |
| Cord length: | 4m |
| Colour: | Black |
| Molded plug end pull force: | > 3kg |
