Features

Professional HD-IP Mini IR Dome Camera, supplied in a low-profile discreet dome housing. A high quality 3.6 mm lens for a 78° viewing angle with high power LEDs allowing night vision up to 15 metres.

The 4 Megapixel (2288 x 1712) CMOS Sensor supplied in the X2C4000MP achieves a resolution approximately nine times that of a conventional camera. This makes it possible to cover nine times the monitoring area, the image quality being the same. In addition, when captured images are enlarged the detail is much clearer.
