

Master Control 700-PMCKIT

MPN: 700PMCKIT

The **700PMCKIT** is a Master Cartridge Relay Kit provides (20 A) switching capability with large single-contact pads on each side of the spanner for twice the current rating to control heavy loads and provide for master control of a system. The cartridge also has the same double-break design as the standard 700-P relay contact cartridge. The relays can be configured with up to a maximum of 12 contacts (only 8 may be N.C). Time delay and latching attachments are compatible with master cartridges.

- NEMA N150 P600 DC rating
- NEMA A600 TwiceAC rating
