Technical Features

Terms & Conditions of liability

PPM tapes must be stored in a dry location, protected from direct sunlight exposure and from freezing. Storage temperatures should be as close as possible to room temperature; suggested storage temperature should range from 15 to 25°C with max. relative humidity of 60%.

Make sure the surface you wish to place the tape on is cleaned, dried and free from oil and dust. It is suggested not to apply the tape with temperatures lower than 10°C. With a storage temperature lower than 10°C, it is always suggested temperature reconditioning of the tape at room temperature (15°C - 25°C) before its use. Shelf life from date of manufacture: (no yellowing and < 10% loss in performance at 23°C, 50% humidity) is considered 12 months for Slit rolls and 6 for Jumbo rolls. PPM does not take responsibility for the defective material is not stored and used in accordance with the conditions listed above.
