

# Outdoor FM Antenna

MPN: 30-2460

## Outdoor Directional FM Antenna

Highly directional outdoor antenna is designed to provide outstanding reception for all broadcast FM stations including HD radio. It's four element Yagi design consists of one driven element, one reflecting and two directing elements, that combine for tremendous directivity and forward gain. It is perfect for receiving those elusive distant stations. Includes mounting hardware for connection to existing mast pipe.

### Specifications:

- Nominal range: 60 ~ 70 miles
- Frequency range: 87.5 ~ 108Mhz
- Forward gain: 7dB max
- Front to back ratio: 15dB max
- Impedance: 75ohm, female "F" connector
- Horizontal beam width: 65°
- Width (widest element): 64"
- Boom length: 66"
