

Process Change Notification

Date: Friday, May 15, 2015

PCR Reference: 555

PCN Reference: 555-PCN180-Public

To Our Value Customer:

As always we appreciate your use of International Rectifier semiconductor products. Our commitment to customer satisfaction and continuous improvement is demonstrated by our change plans to enhance capacity, quality and reliability. This notice is to inform you of the following changes.

We would like to express our sincere appreciation for your cooperation regarding the following changes, and IR will work closely with you to support your requirements during this transition.

Type of Change Notification:

Bill of materials (BOM) and process harmonization

Description of Change:

Automotive IGBT Products in package TO247- Termination finish and Die Coat
Change from tin dipping finish to tin electro-plating finish on lead frame
Removal of die coating on Copack diode

PartNumber	Package	PCN Change
AUIRG4PH50S	TO247	Electro-plating
AUIRG4PH50S-205	TO247	Electro-plating
AUIRGP35B60PD	TO247COPAK	Electro-plating
AUIRGP35B60PD-E	TO247COPAK	Electro-plating
AUIRGP4062D	TO247COPAK	Electro-plating + Die coat removal
AUIRGP4062D-E	TO247COPAK	Electro-plating + Die coat removal
AUIRGP4063D	TO247COPAK	Electro-plating + Die coat removal
AUIRGP4063D-E	TO247COPAK	Electro-plating + Die coat removal
AUIRGP4066D1	TO247COPAK	Electro-plating
AUXVNGP4062D-E	TO247COPAK	Electro-plating + Die coat removal

Reason for the Change:

Harmonized lead finish in-line with mass market requirements Improved product robustness via process automation and process modernization Equipment obsolescence, hence the need for process change to utilize assembly equipment supported by mass market

Effect Date:

Wednesday, November 11, 2015

International Rectifier will consider this change approved and will implement it by the effective date unless specific conditions of acceptance or data requests are provided in writing within 30 days of receipt of this notice. Please submit conditions of acceptance and data requests to the PCN coordinator listed at the end of this notice.

Impact of Change:

The functionality of the product will remain unchanged. Very minor change expected on the fit of the product due to smaller tolerances on the lead thickness due to tin plating. The form of the product will visibly change. The die coat removal is internal inside the package and will not be visible. The overall impact is assessed as positive for the customer

Method of Identifying Changed Product:

The changed product is visible with the naked-eye. The finishing of target new process will appear brighter as compared to the existing.

Products Affected:

IR Part	Description
AUIRG4PH50S	Automotive, 1200V 74.000A AUTO TO-247
AUIRG4PH50S-205	
AUIRGP35B60PD	Automotive 600V Warp2 150kHz Copack IGBT in a TO-247AD package
AUIRGP35B60PD-E	Automotive 600V Warp2 150kHz Copack IGBT in a TO-247AD package
AUIRGP4062D	
AUIRGP4062D-E	
AUIRGP4063D	Automotive 600V co-pack Trench IGBT in a TO-247AC package
AUIRGP4063D-E	Automotive 600V co-pack Trench IGBT in a TO-247AC package
AUIRGP4066D1	
AUXVNGP4062D-E	

Qualification:

Parts passed all the reliability testing requirements. Reliability qualification report is available upon request. Qualification standards can be found on International Rectifier's web site at www.irf.com/product-info/reliability

Supporting Data Availability:

Contact IR for supporting data on this change.
