
PRODUCT CHANGE NOTICE

**Alternate Manufacturing Site
for Assembly of the Listed
Intersil PLCC Packaged
Products**

**Refer to:
PCN12087**

Date: November 7, 2012

November 7, 2012

To: Our Valued Intersil Customer

Subject: **Alternate Manufacturing Site for Assembly of the Listed Intersil PLCC Packaged Products – Amkor Technology, Philippines (ATP)**

This notice is to inform you that Intersil will begin using the Amkor Technology (ATP) facility in the Philippines as an alternate site for assembly of the listed PLCC (Plastic Leaded Chip Carrier) packaged products. This action will expand current capabilities and capacities to optimize Intersil's ability to meet customer's delivery requirements. The product and site-specific qualification activities are in progress and expected to complete during Q1 CY2013.

The Amkor Technology (ATP) facility is ISO 9001:2008, TS 16949:2009, and ISO 14001:2004 certified. The ATP facility is qualified as a supplier to Intersil for performing assembly of packaged products, including the PLCC package style. There will be no change in the package outline drawing (POD), bond wire (diameter or material), die attach, or moisture sensitivity level (MSL) for the listed products. The material set combinations for assembly and other key items are listed in the table below.

Key Items	ANST Current	ATP NEW (Alternate)
Mold Compound	Sumitomo G600 / G700	Sumitomo G600
Die Attach	A8361J	A8361J
Bond Wire - Gold (Au)	1.2 mil	1.2 mil
Lead Frame Material	C151	C151 / C194
Moisture Sensitivity Level	3 or 4	3 or 4
Device Marking - Site Code	V	L

The assembly qualification plan is designed using JEDEC and other applicable industry standards to confirm there is no impact to form, fit, function, or interchangeability of the product. A summary of the qualification plan is included for reference. The qualification results will be available for review upon completion by request. The remainder of the manufacturing operations (wafer fabrication, package level electrical testing, shipment, etc.) will continue to be processed to previously established conditions and systems.

Product affected by this change is identifiable via Intersil's internal traceability system. In addition, product assembled at ATP may also be identified by the assembly site code (country of assembly) when marked on the devices. The site code for product assembled at ATP with gold bond wire is "L".

Intersil will take all necessary actions to conform to agreed upon customer requirements and to ensure the continued high quality and reliability of Intersil products being supplied. Customers may expect to receive product assembled at either the current or the newly qualified sites beginning *ninety* days from the date of this notification or earlier with approval.

If you have concerns with this change notice, Intersil must hear from you promptly. Please contact the nearest Intersil Sales Office or call the Intersil Corporate line at 1-888-468-3774, in the United States, or 1-321-724-7143 outside of the United States.

Regards,

Jon Brewster
Intersil Corporation
